

Bonotech turns
business needs
into **software**
built with **precision**
and **speed**.

From **custom software**
to **applied AI**, we move fast,
refine faster and **engineer**
technology around how
businesses actually work.

OF EXCEPTIONAL ENGINEERING

PROJECT 01

Get My Grail helps collectors discover, buy, sell and request graded cards, with regional consignors and secure vault custody built into every transaction.

Industry: Entertainment

Platform Surfaces We Built

Mobile App

Product marketplace, sell, consign, wallet

Cloud Functions

Auth, data, privileged ops, Stripe, notifications

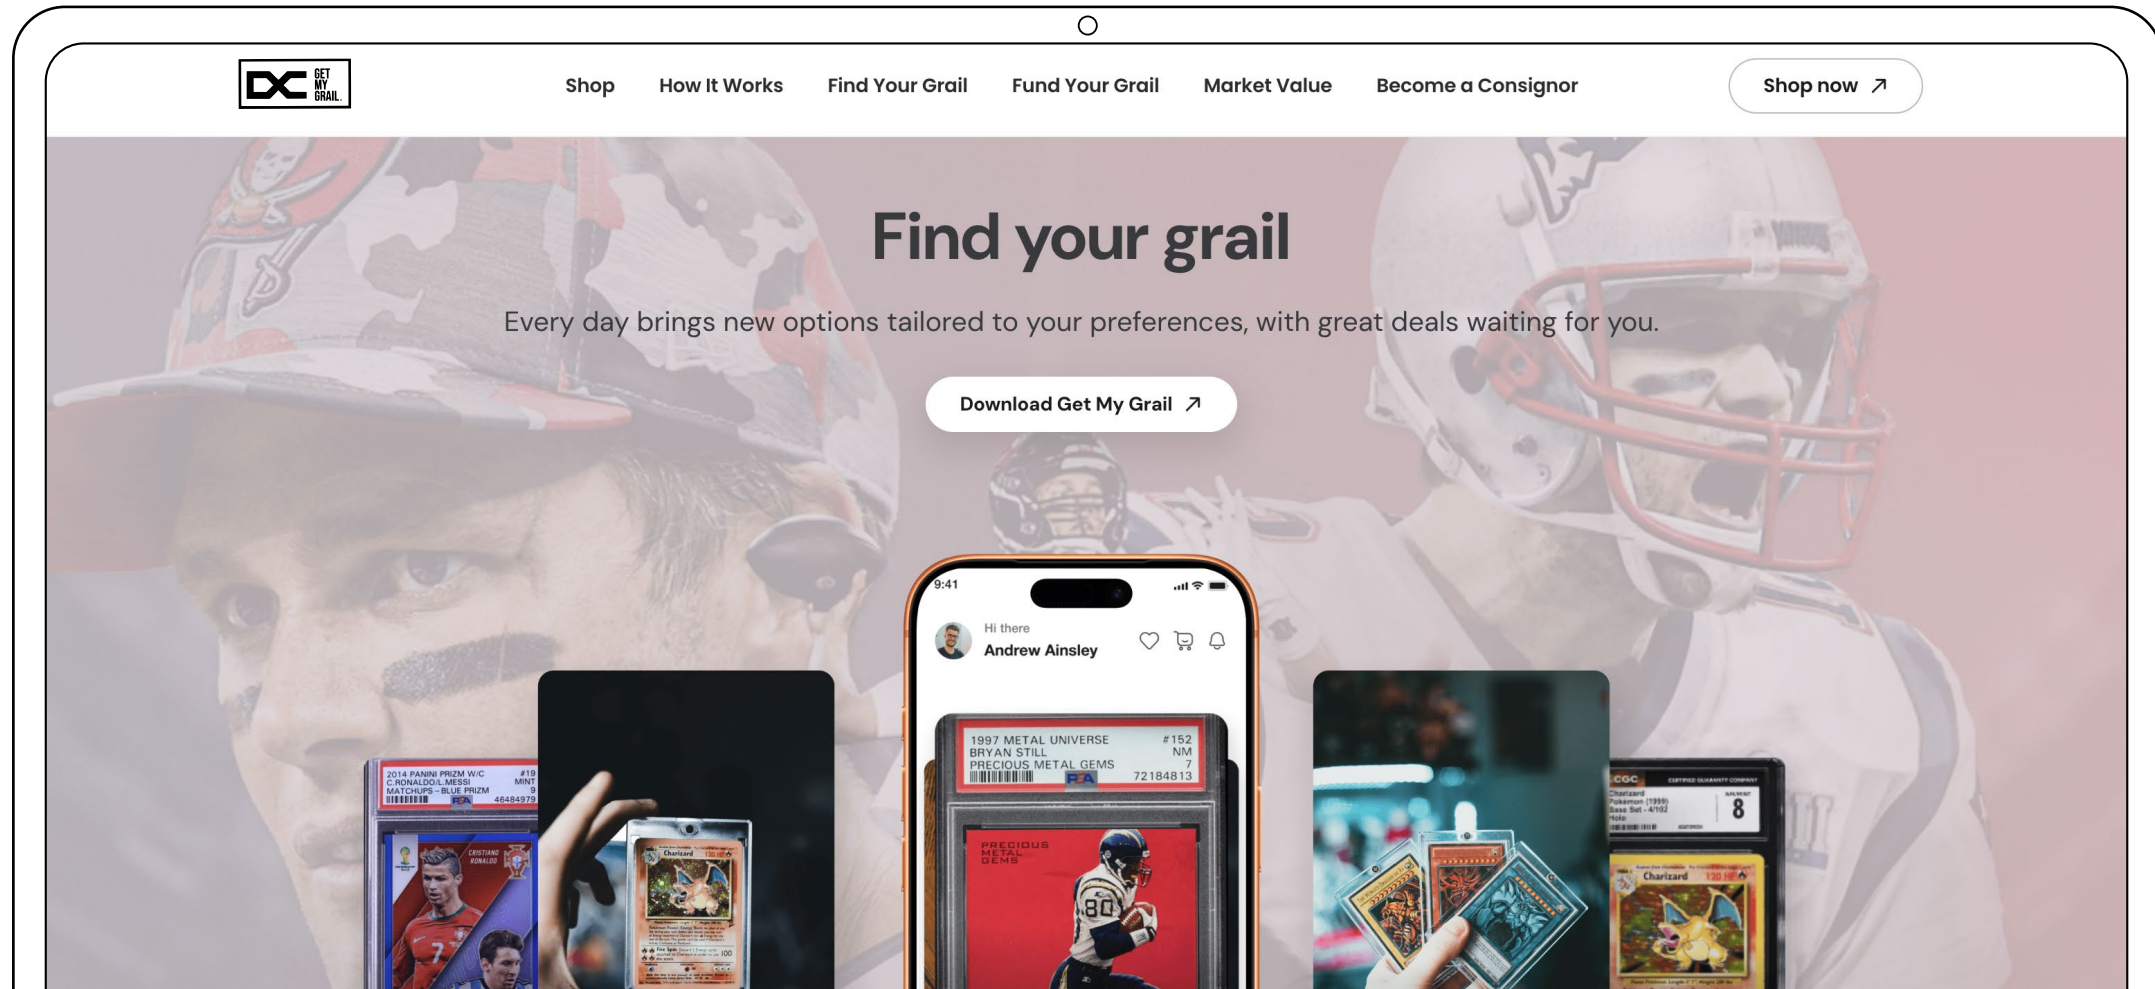

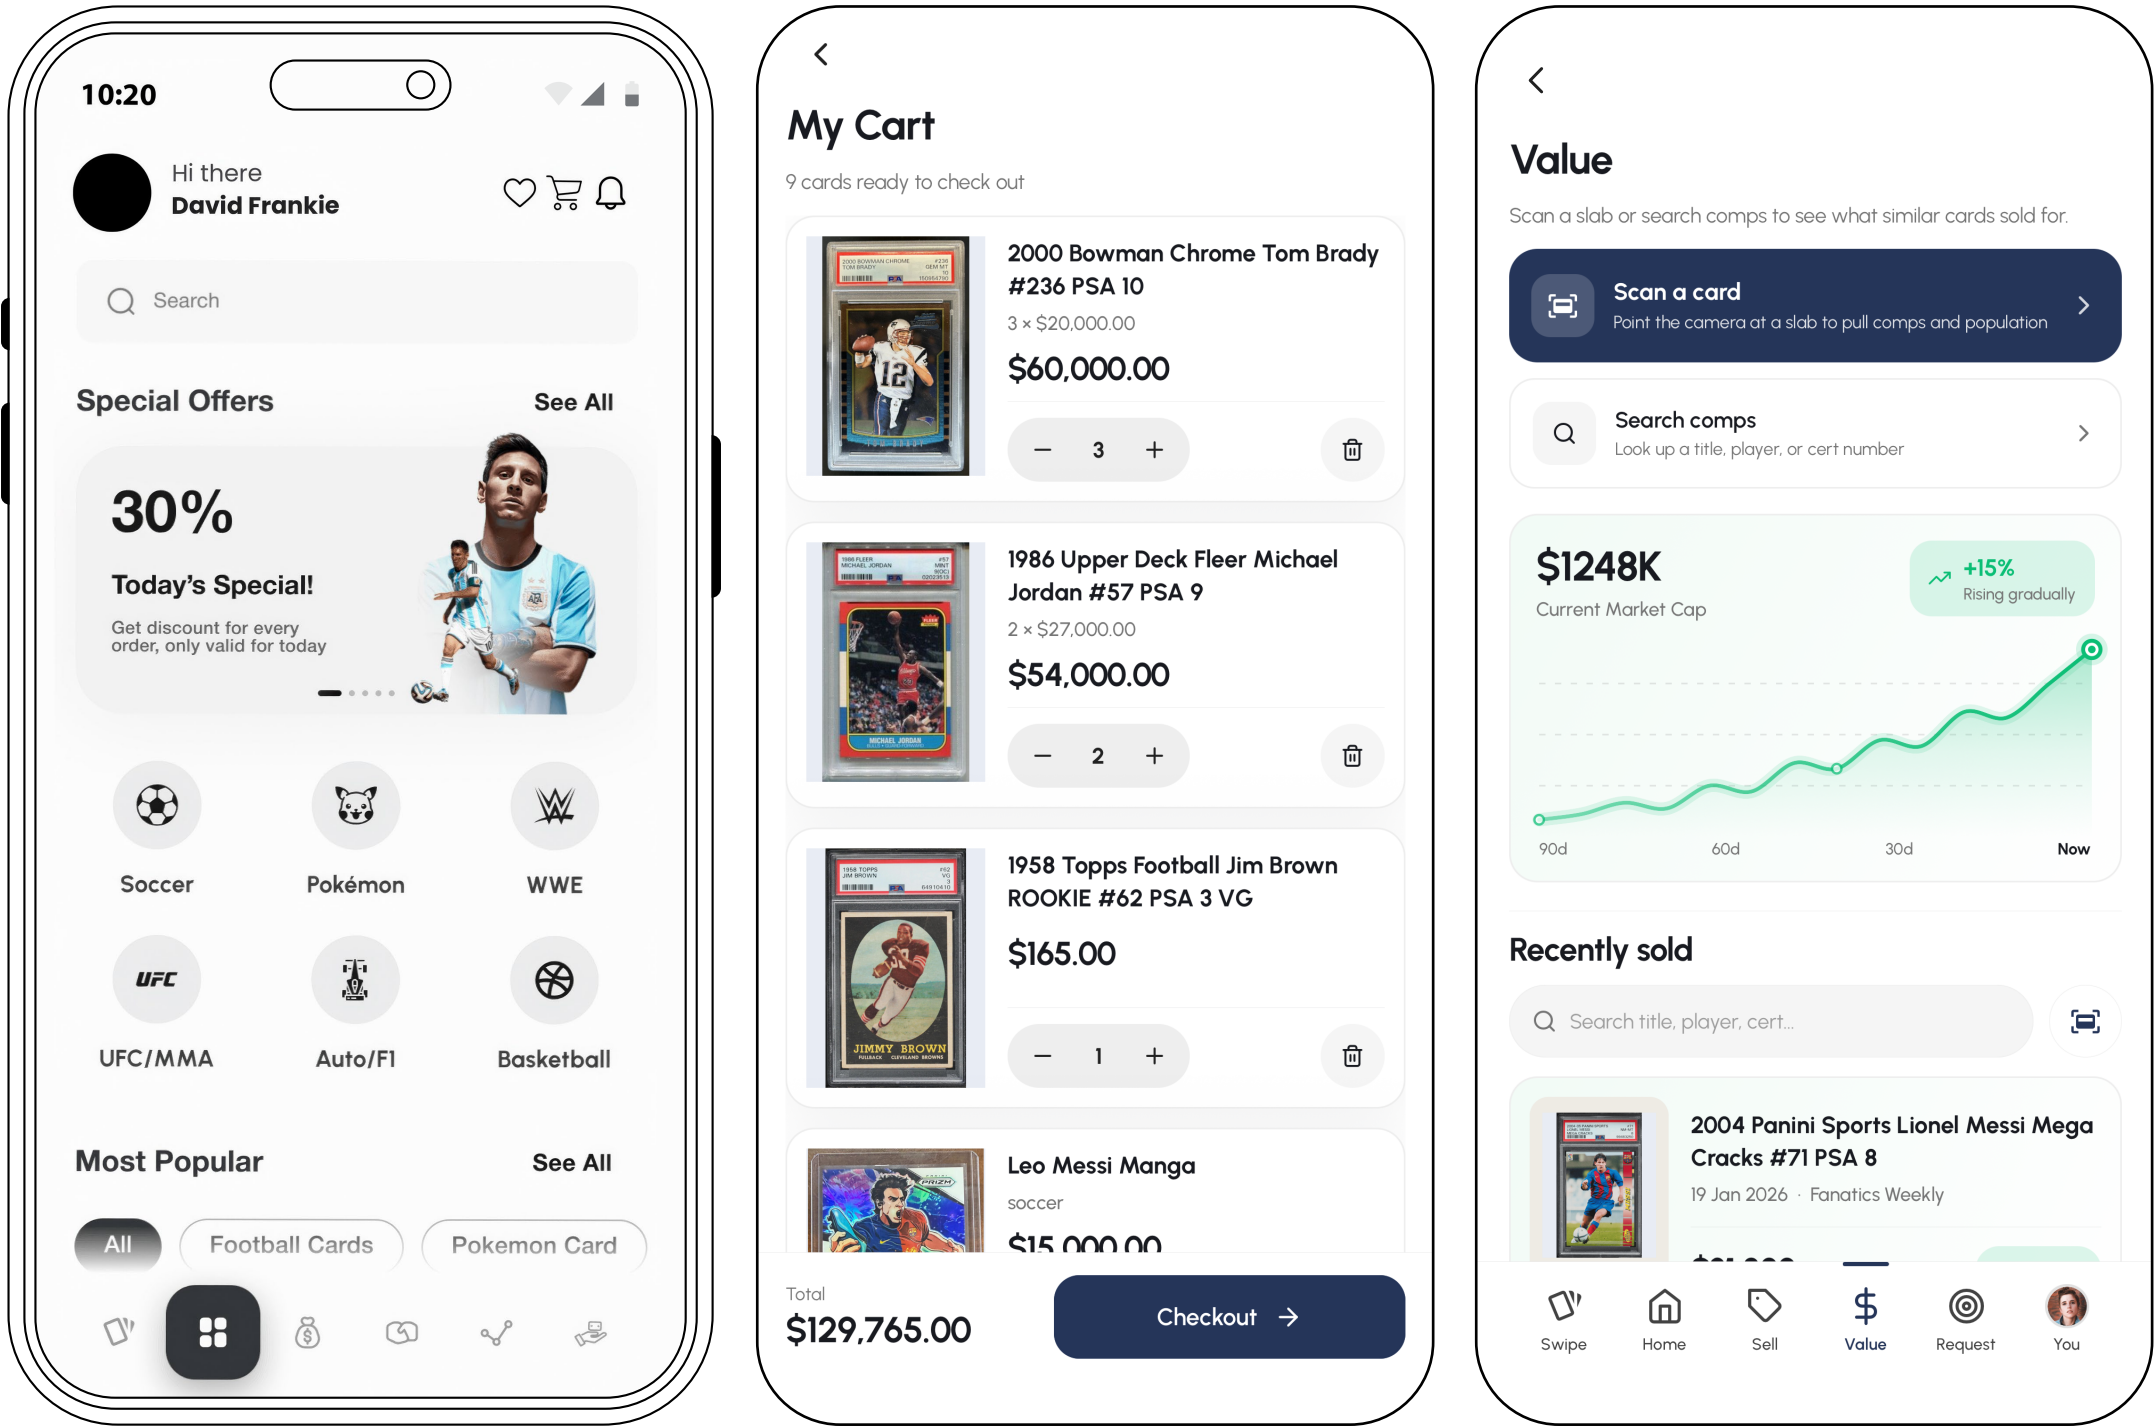

Web

Landing, shop, consignor apply, admin

Shared API

Uploads and cross-product backend utilities

Sprint Timeline: 30 Days

PROJECT 01

Sprint Breakdown

- Phase 1** Defining The Product
Day 1-4
- Phase 2** Building The Marketplace
Day 4-16
- Phase 3** Card Verification & Storage Workflow
Day 16-24
- Phase 4** Enabling Trading & Payments
Day 24-27
- Phase 5** Testing & Launching
Day 27-30

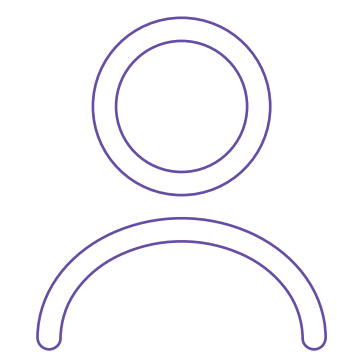

Timeline: 30 Days

We Hit

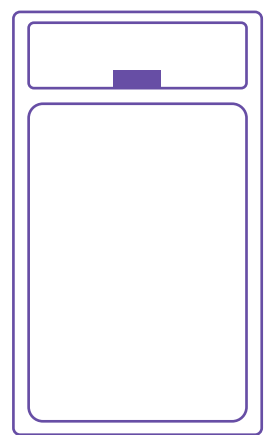

On The Silos

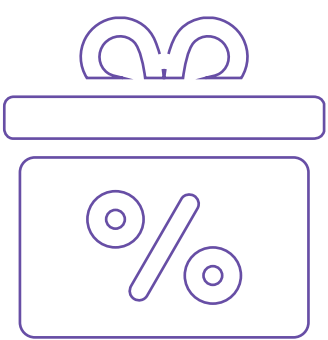

To Build **One Connected Marketplace-**

How We Made The ↑ Shift To AI-First

PROJECT 03

Gustav is an all-in-one digital solution for hotels and resorts. From rooms and reservations to dining, requests, concierge, finance and loyalty, hotel teams work through one system while guests access a branded digital concierge throughout their stay.

Industry: Hospitality Tech

Platform Surfaces We Built

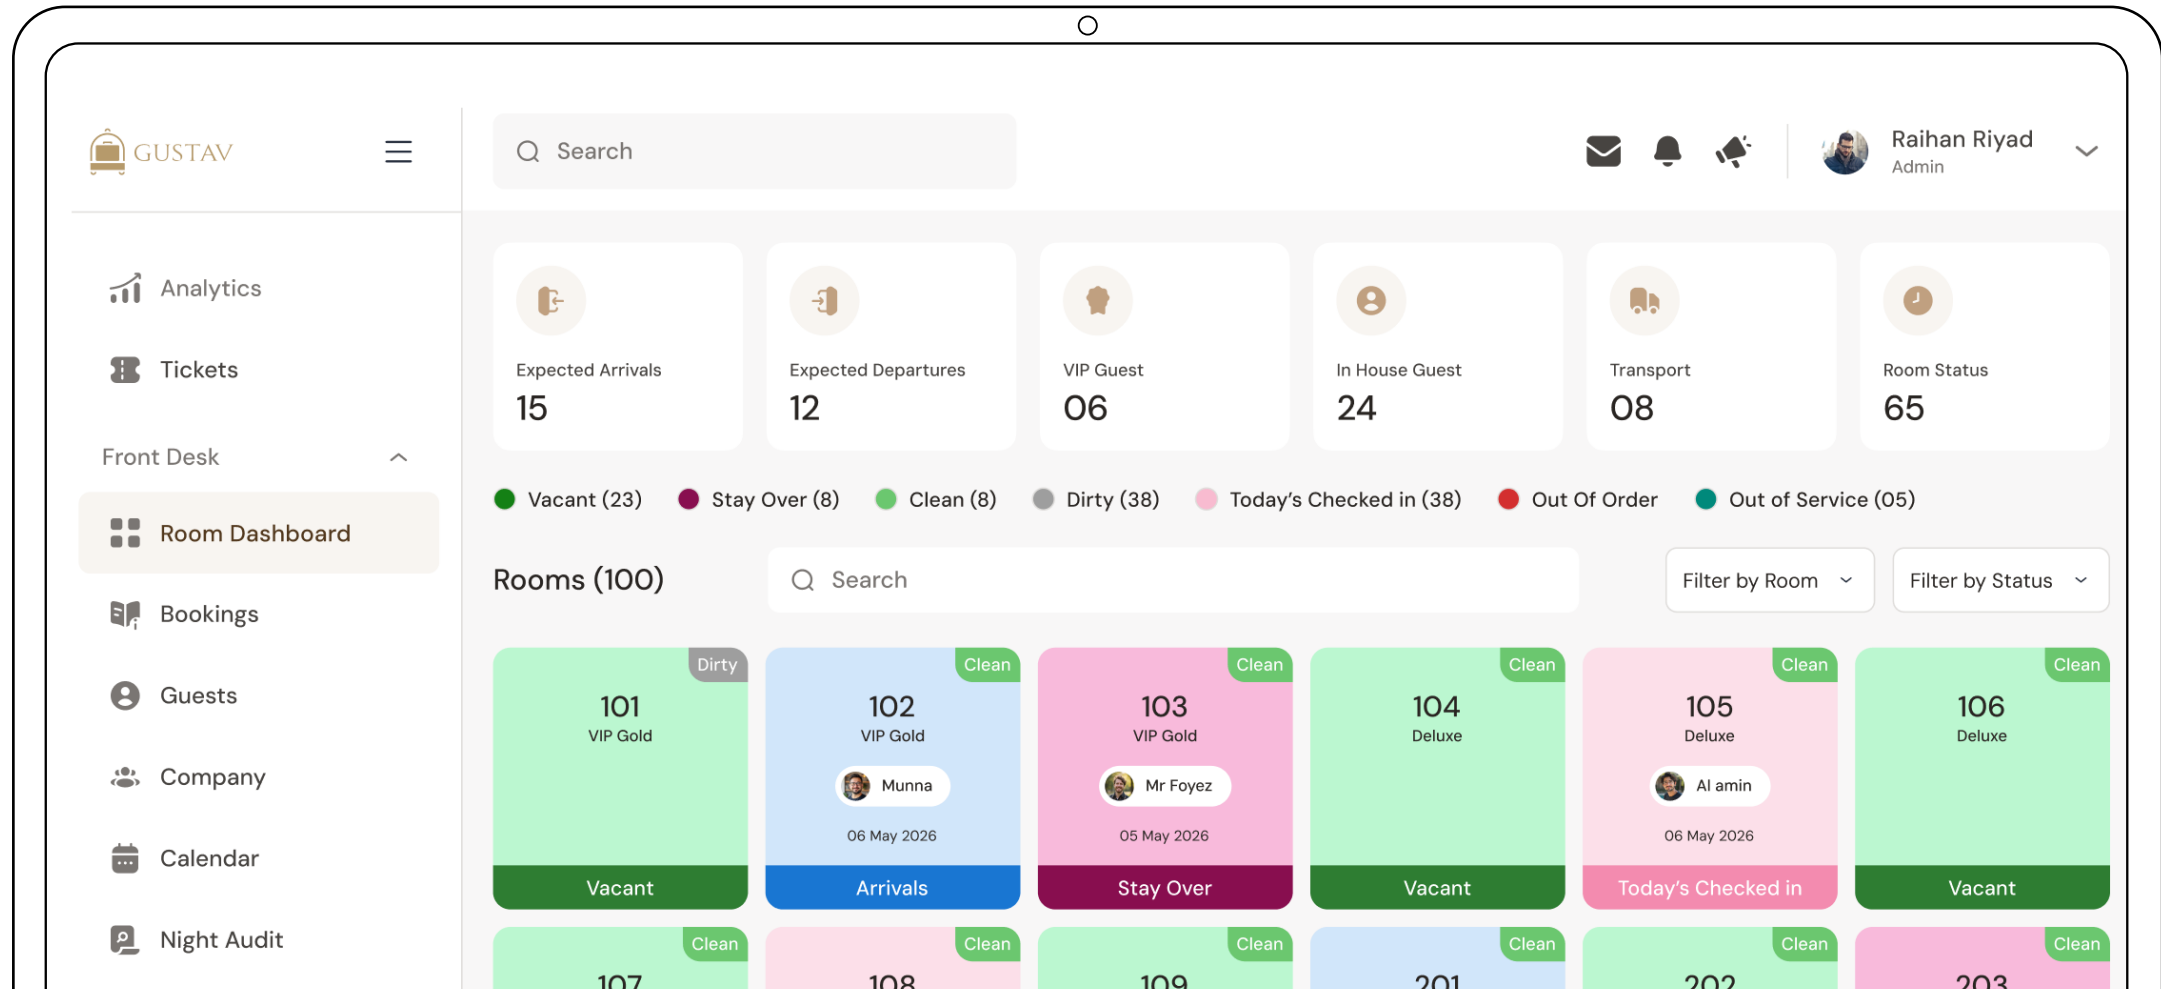

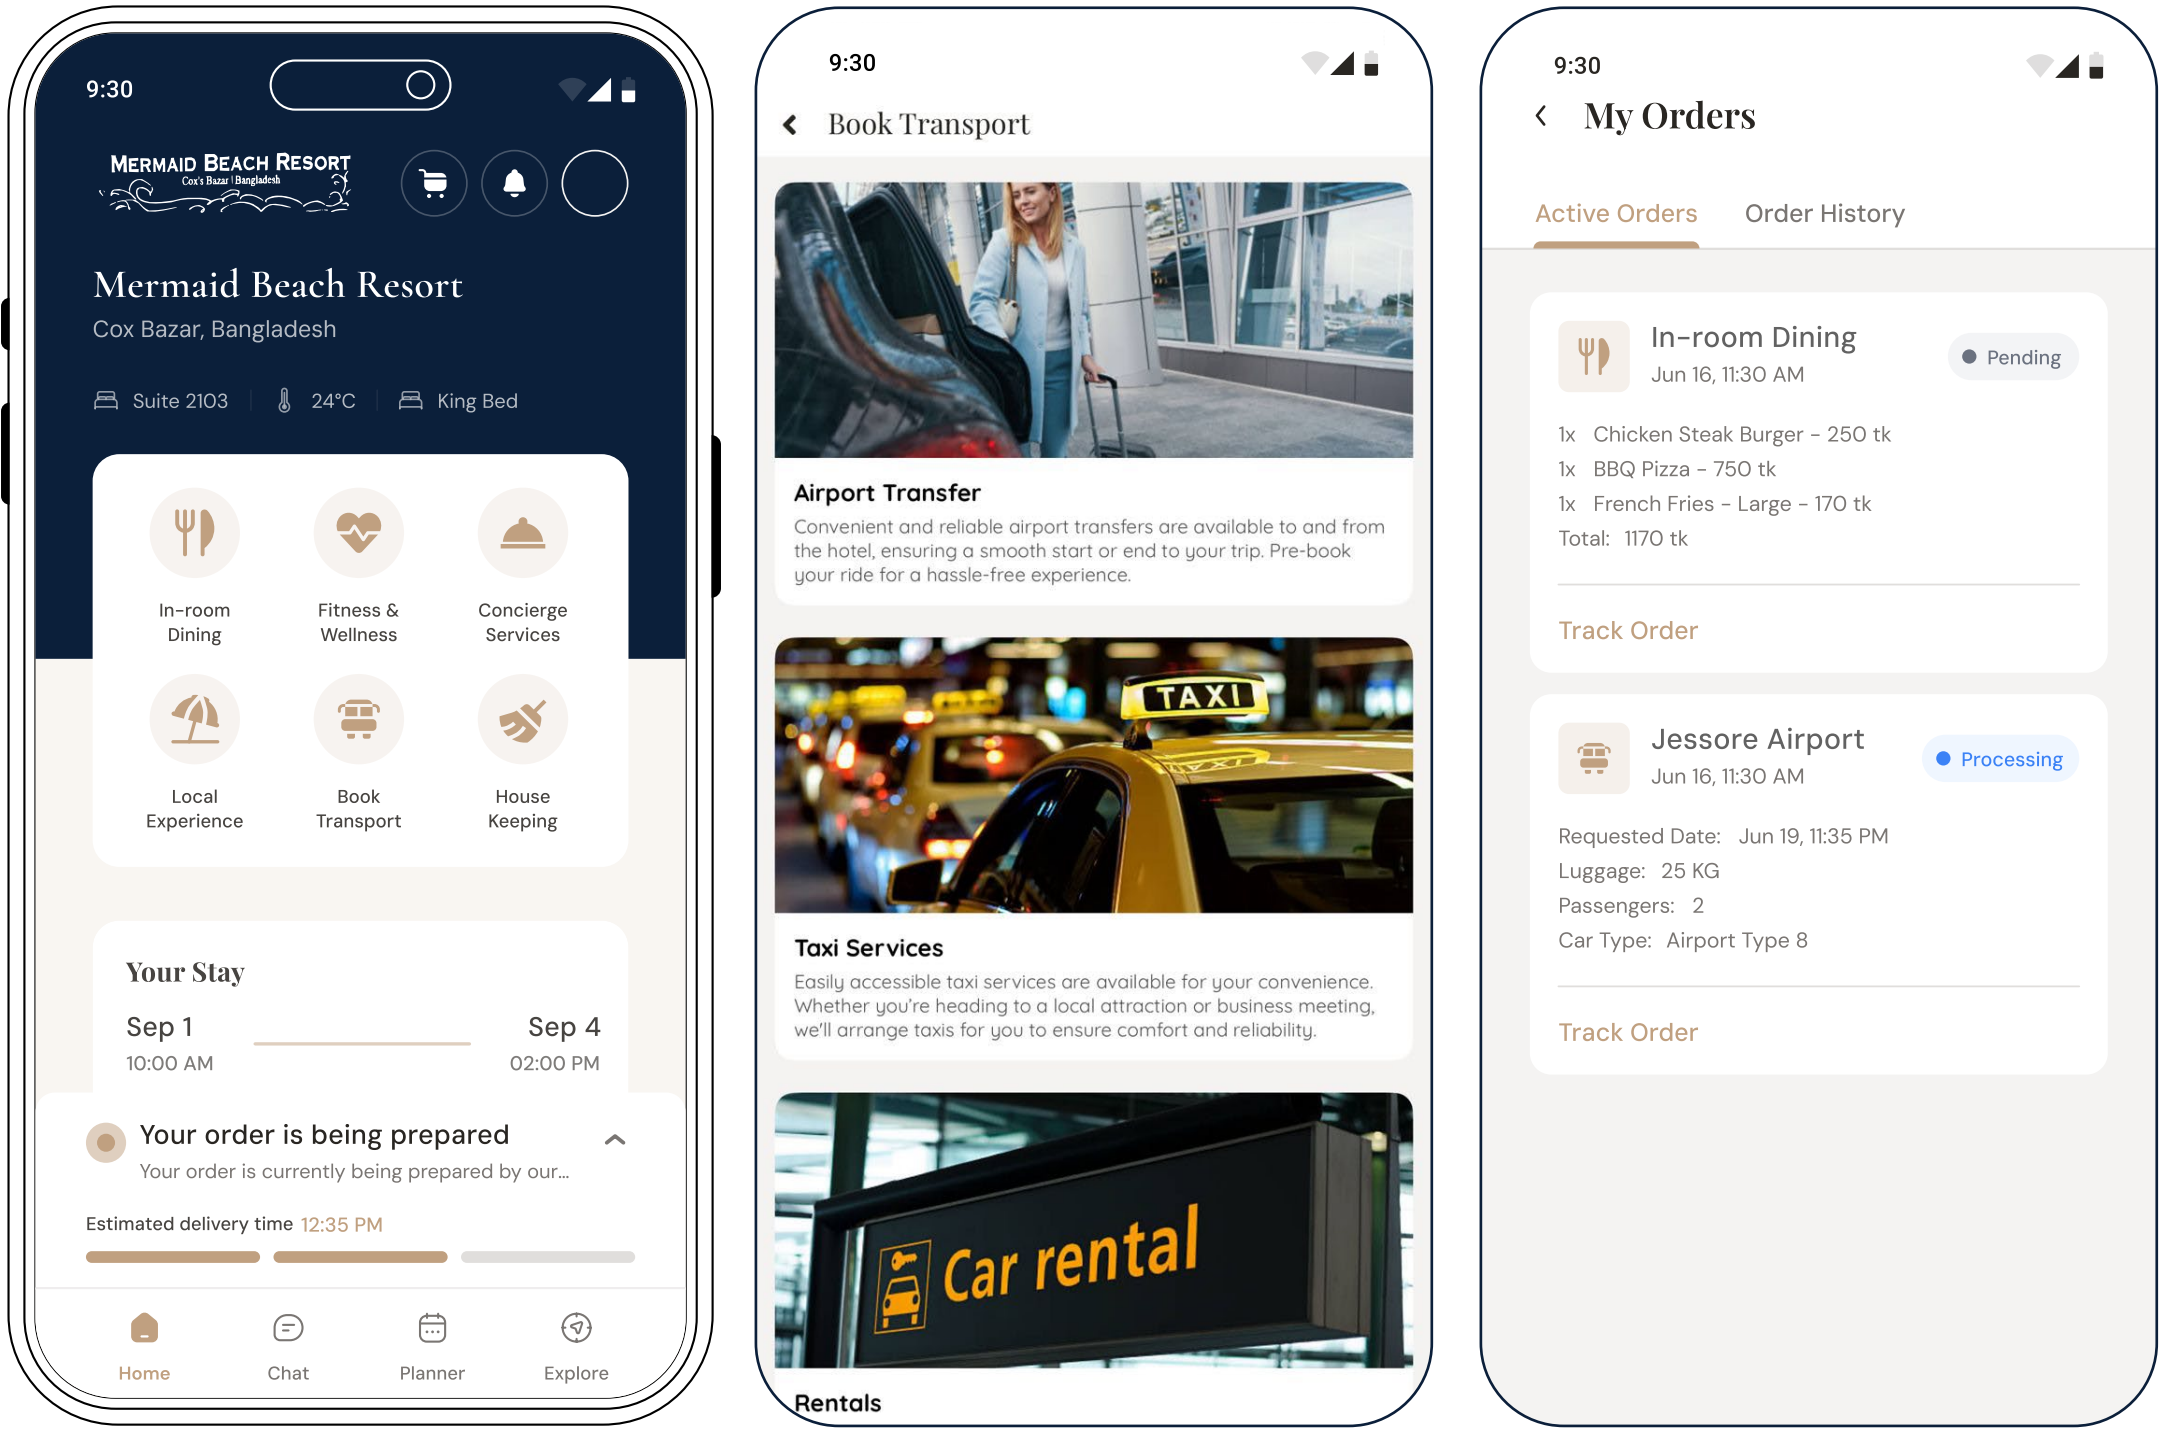

Guest Mobile App
Check-in, ordering, concierge and requests

Web Admin
Front office, F&B, finance, HR and analytics

Staff Mobile App
Rooms, guest tickets and service fulfilment

Cloud & Integrations
Real-time data, payments, messaging and access control

Sprint Timeline: 3 Months

PROJECT 03

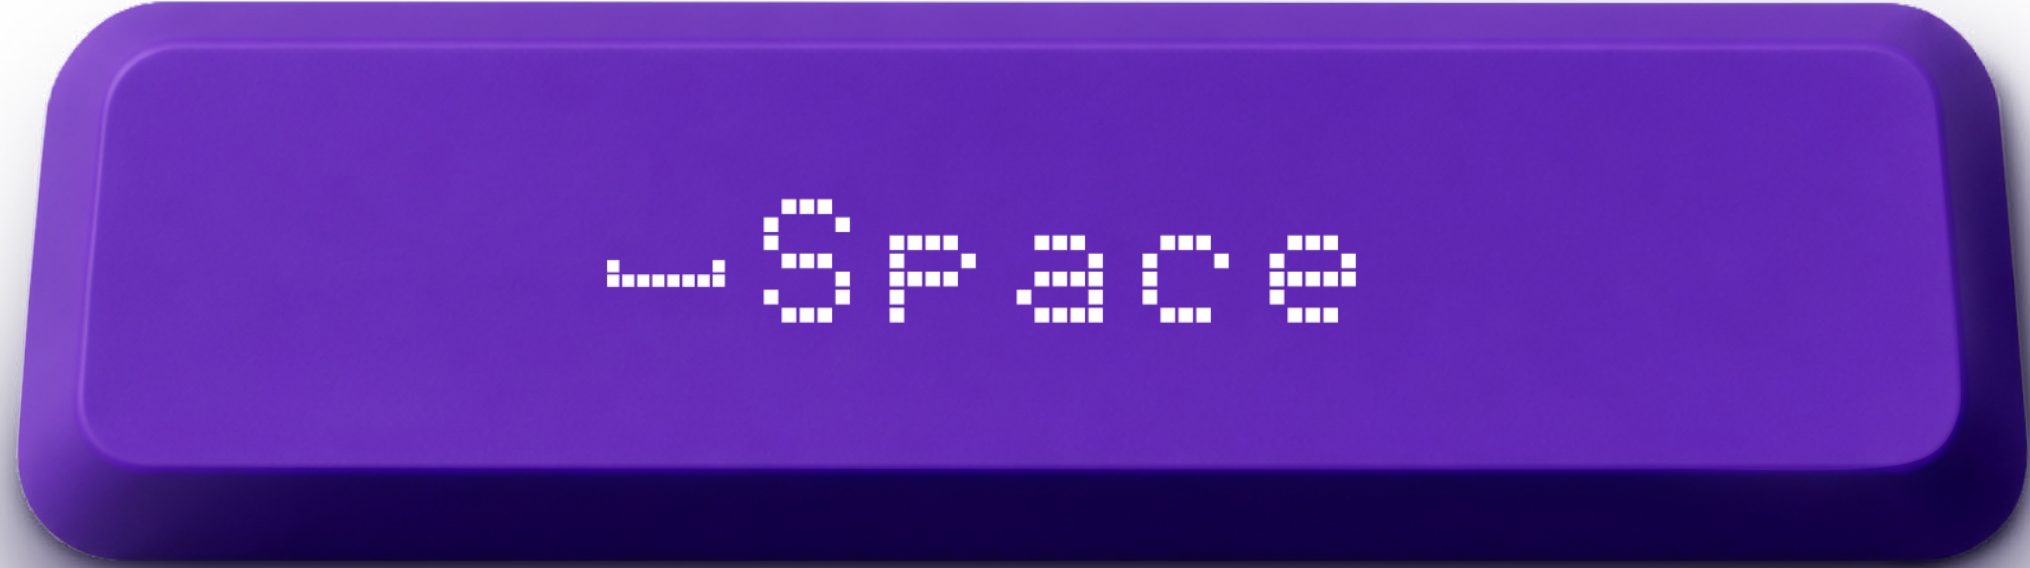

Sprint Breakdown

- Phase 1** Defining The Platform
Week 1–2
- Phase 2** Rooms, Bookings & Front Desk Digitization
Week 2–4
- Phase 3** Creating The Guest Concierge
Week 4–6
- Phase 4** Connecting F&B, Banquets & Staff
Week 6–8
- Phase 5** Adding Finance & Integrations
Week 8–10
- Phase 6** Testing, Securing & Launching
Week 10–12

Timeline: 3 Months

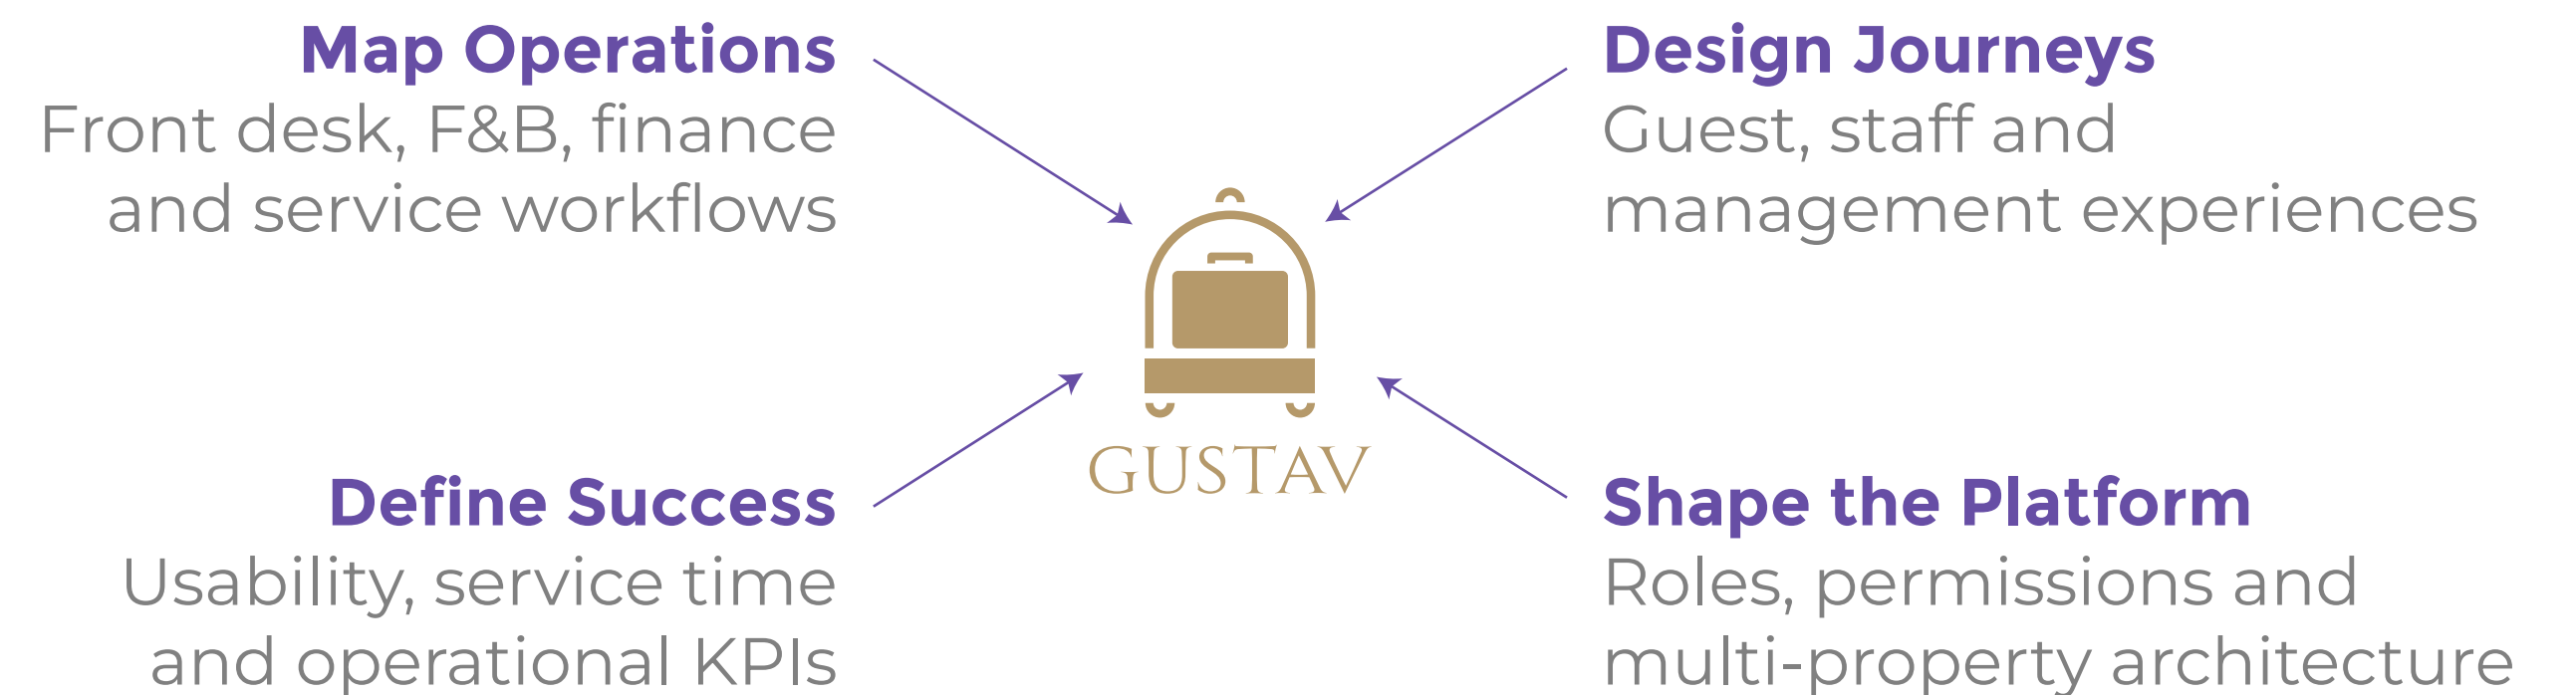

There Was

— \$pace

For Consultancy

So, before engineering Gustav, we thoroughly **studied hotel operations** and **operators** to:

PROJECT 04

Olmo Homes brings landlords, property managers and tenants into one connected digital system.

Built across iOS, Android and web, it unifies rent collection, maintenance, onboarding and multi-property management.

Industry: PropTech

Intelligence Surfaces We Built

Multi-Role Property Control

Connects owners, managers and tenants securely

Maintenance Workflow

Assigns, tracks and records service requests

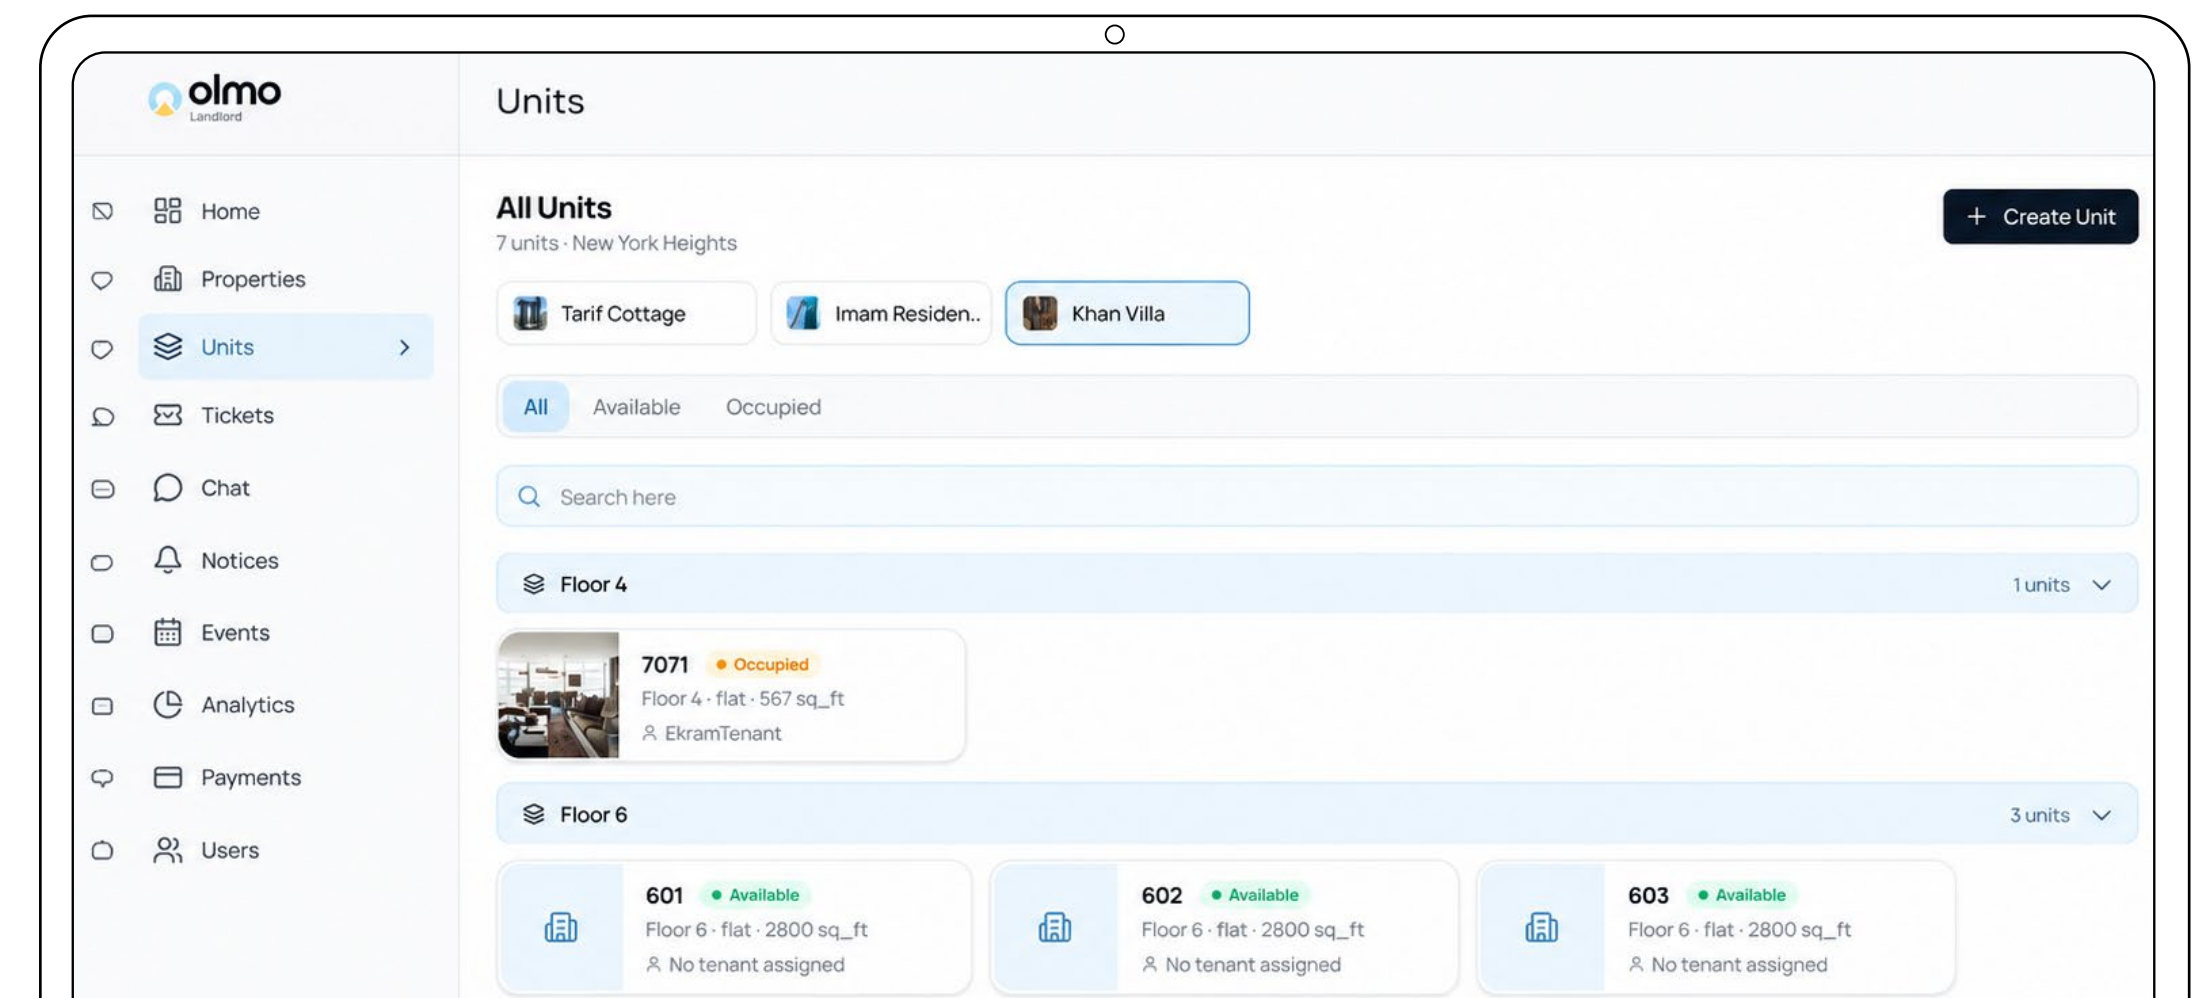

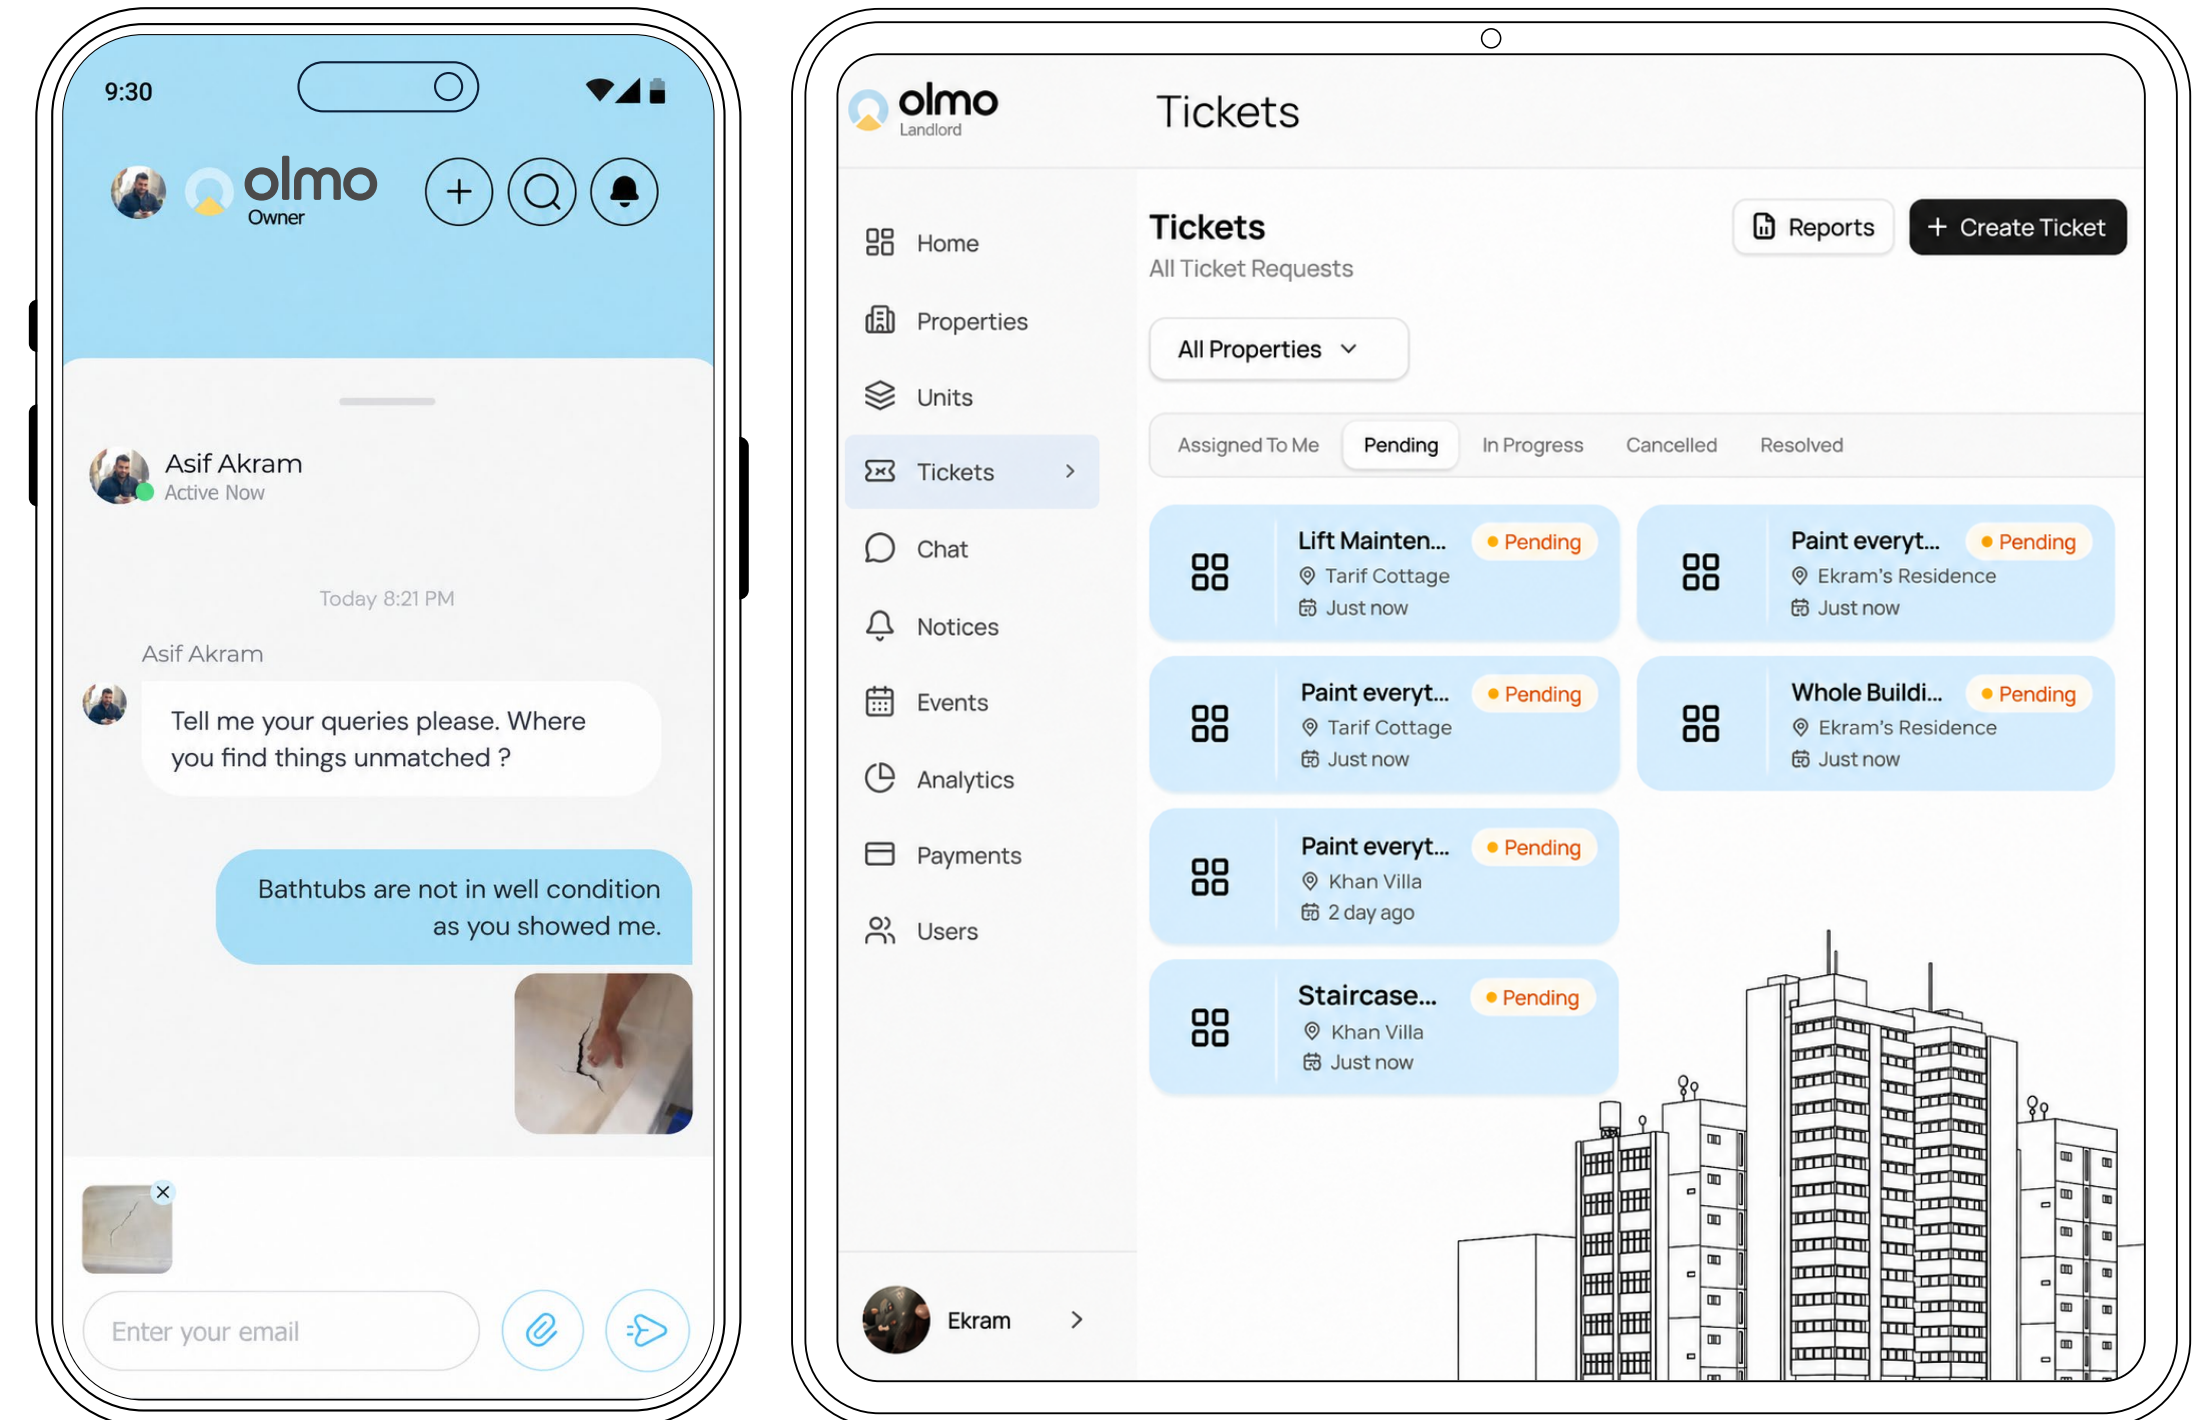

Integrated Rent Operations

Tracks dues, receipts and online payments

Digital Tenant Onboarding

Manages invites, documents and rental agreements

Sprint Timeline: 2 Months

PROJECT 04

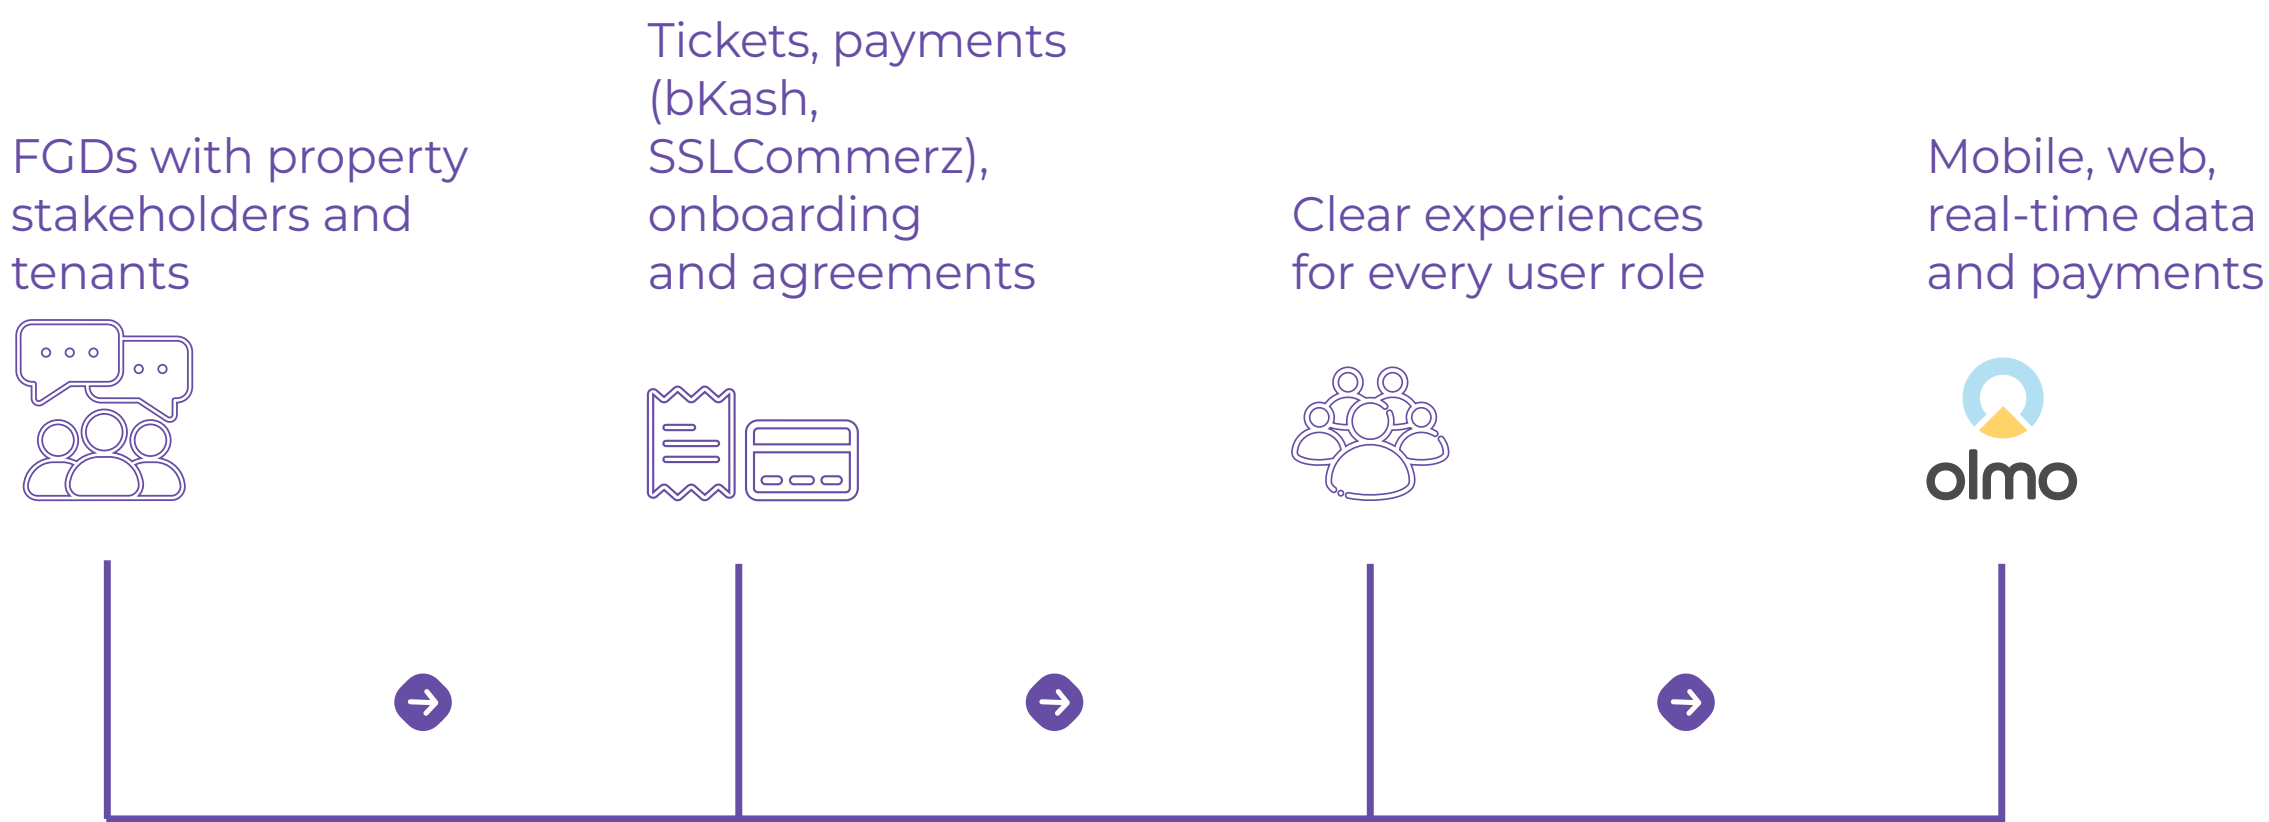

Sprint Breakdown

- Phase 1** Defining Roles, Workflows & KPIs
Week 1
- Phase 2** Building Mobile, Web & Data Foundations
Week 2
- Phase 3** Connecting Properties, People & Contracts
Week 2-4
- Phase 4** Enabling Rent, Payments & Reporting
Week 4-6
- Phase 5** Testing, Launching & Stabilizing
Week 6-8

Timeline: 2 Months

How We Put Property Management Under

PROJECT 05

EVO GRADING
CLEAN CARDS. HIGHER VALUE

EVO helps collectors professionally clean and prepare trading cards for grading.

Bonotech built the digital platform connecting card intake, prep services, tracking, billing, shipping and PSA order management.

Industry: Entertainment

Platform Surfaces We Built

Customer Web Platform

Card submission, service selection and tracking

Grading Coordination

Tier grouping, order tagging and batch processing

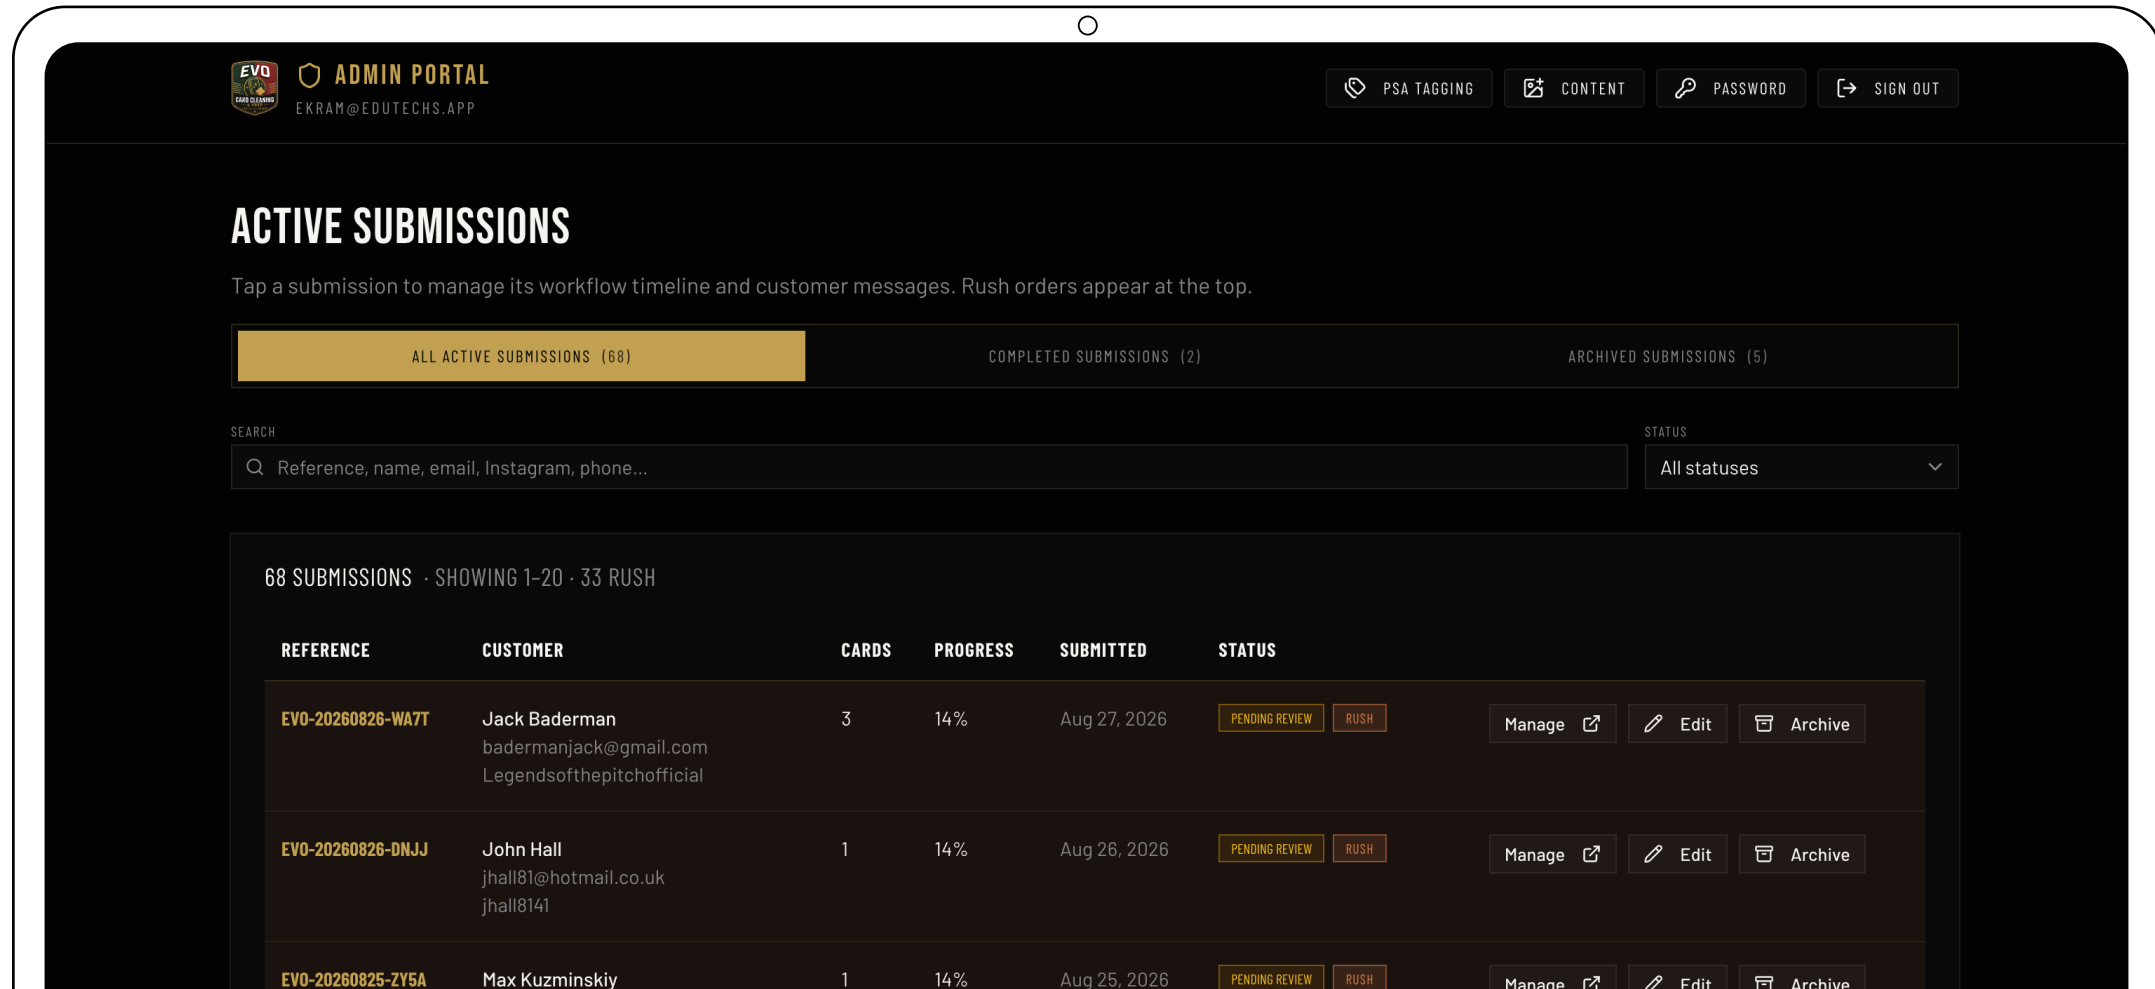

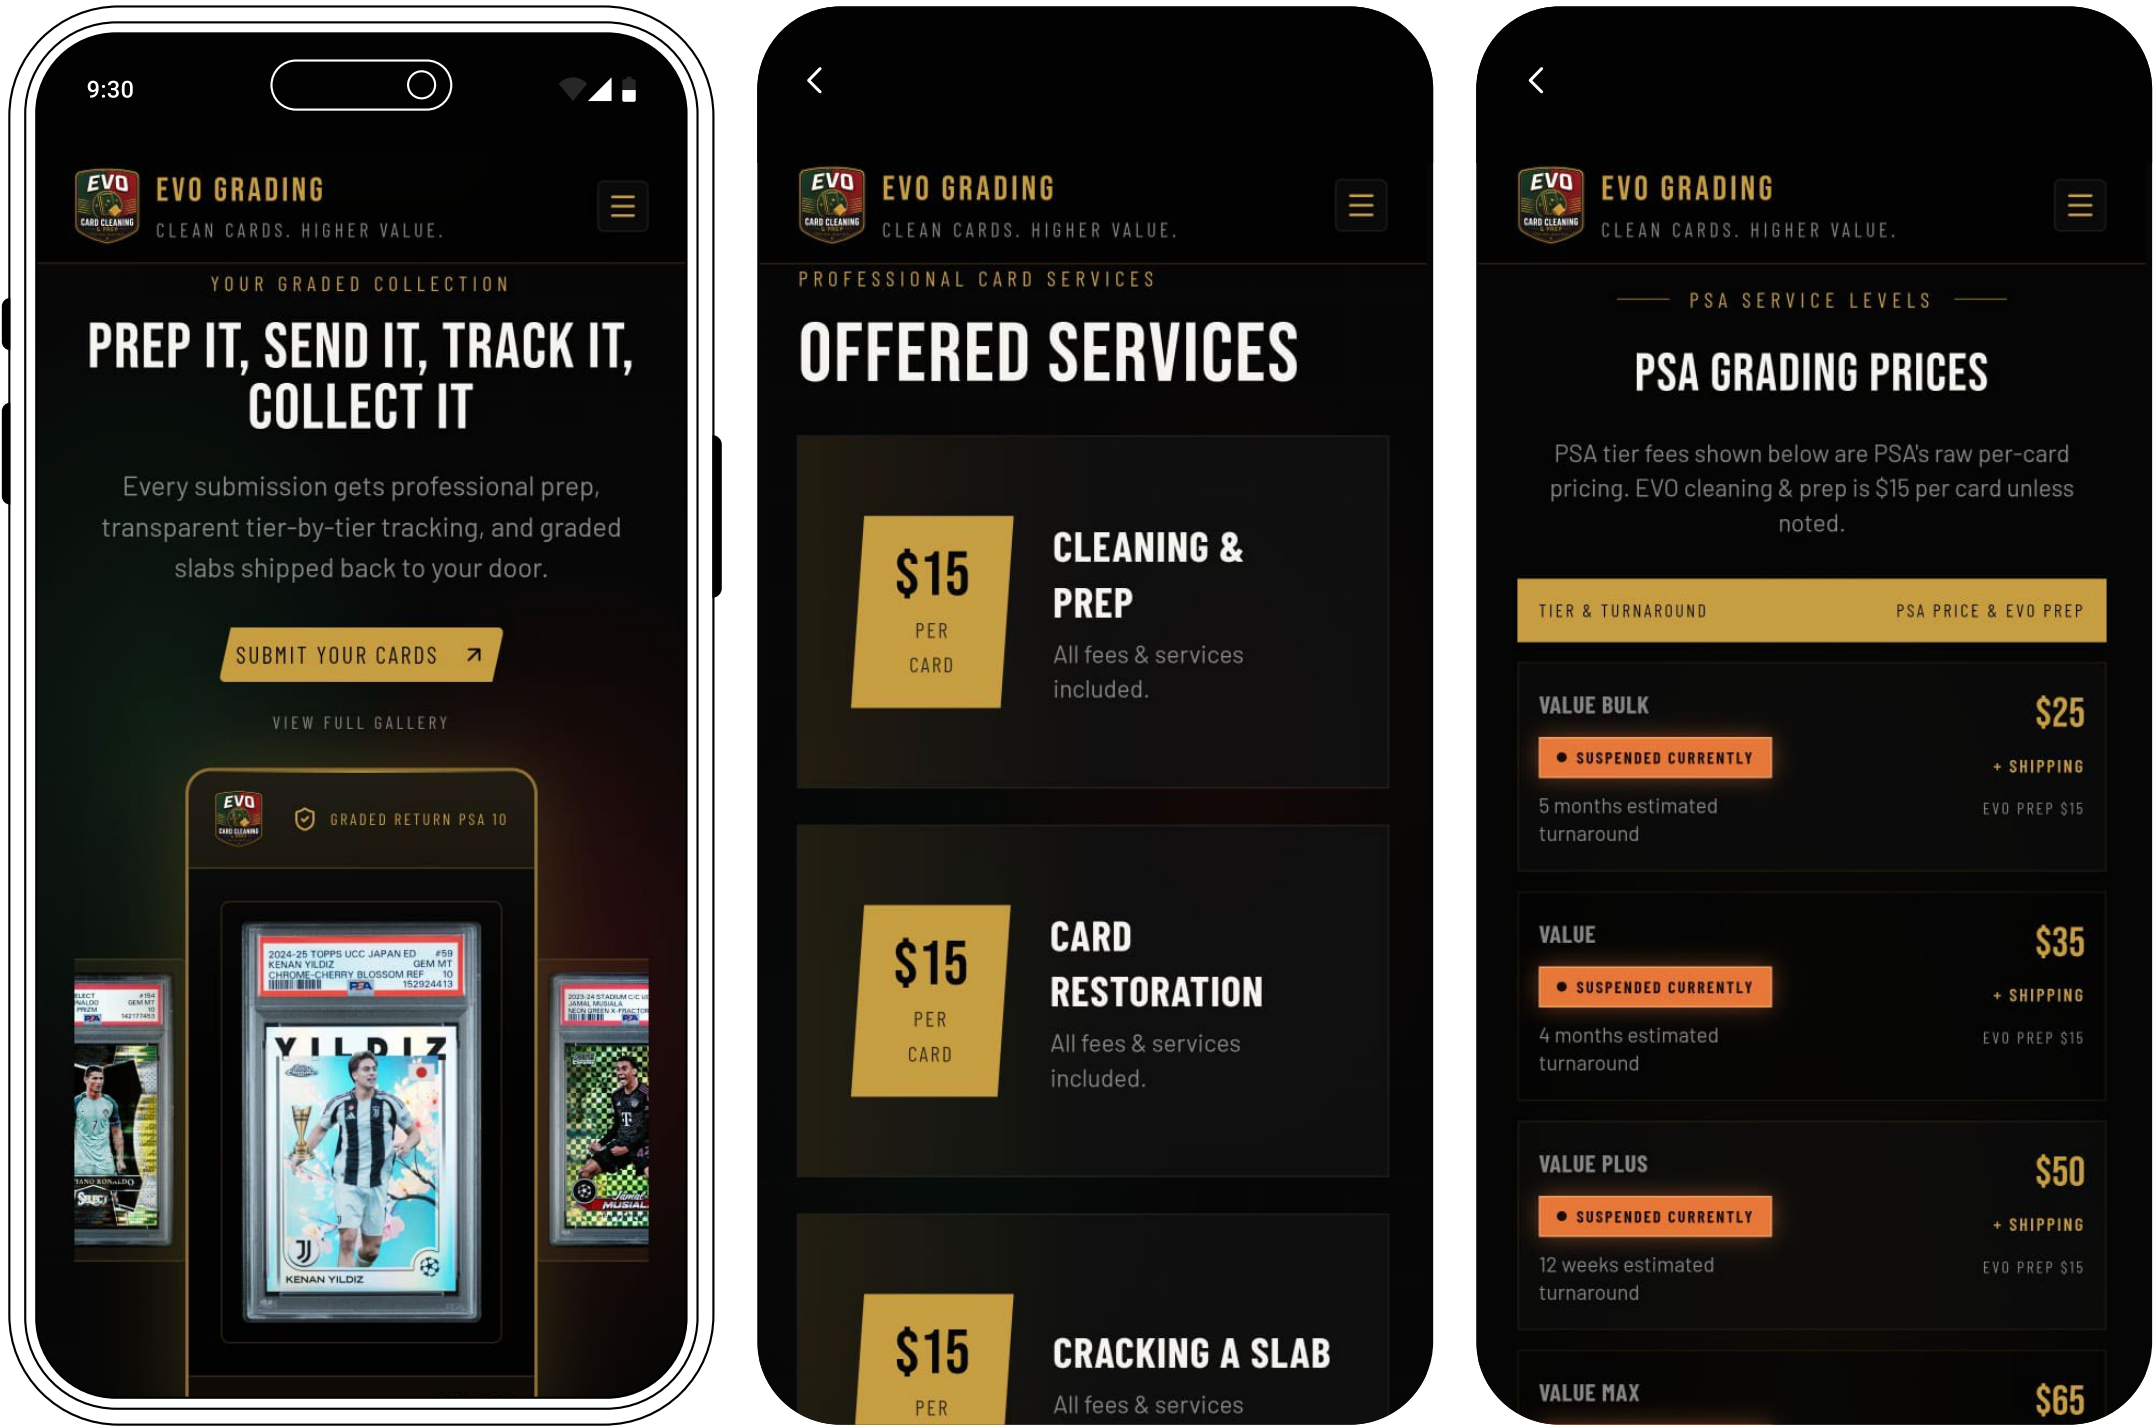

Sprint Timeline: 30 Days

Operations Admin Portal

Submission review, communication and workflow management

Billing & Fulfilment

Pricing, invoicing, return shipping and completion

PROJECT 05

Every Card. One Traceable Journey.

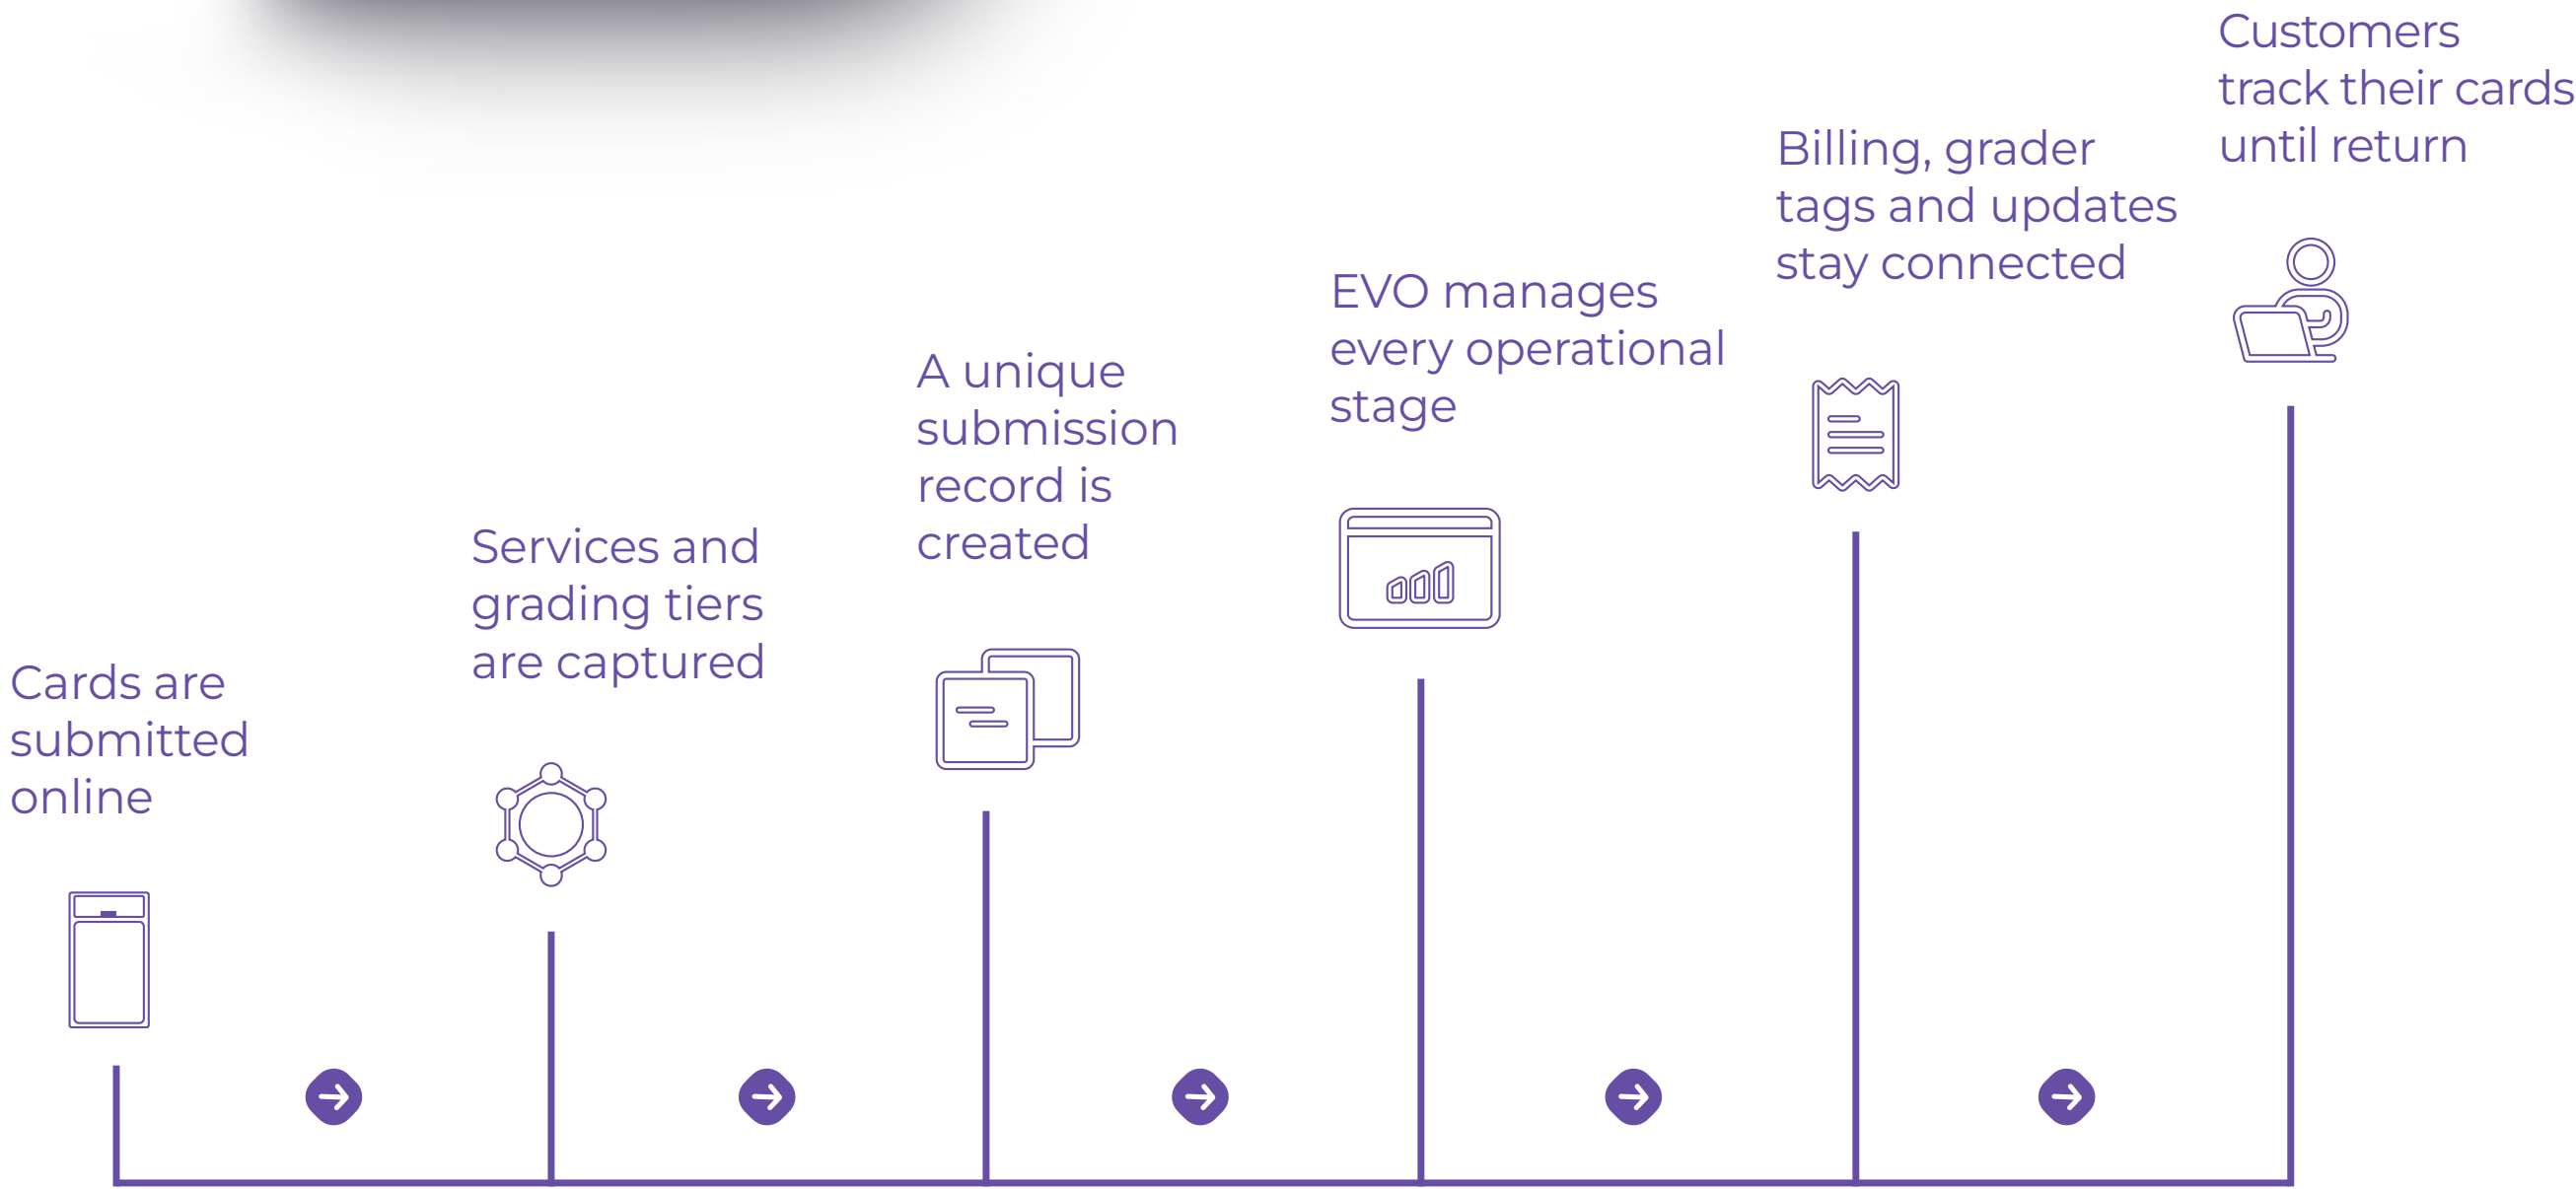

- Phase 1** Defining The Submission Journey
Day 1–4
- Phase 2** Building Customer Submissions & Tracking
Day 5–11
- Phase 3** Building The Operations System
Day 12–19
- Phase 4** Adding Billing, PSA Tagging & Automation
Day 20–26
- Phase 5** Testing & Launching
Day 27–30

Timeline: 30 Days

How We Pressed

On Manual Operations

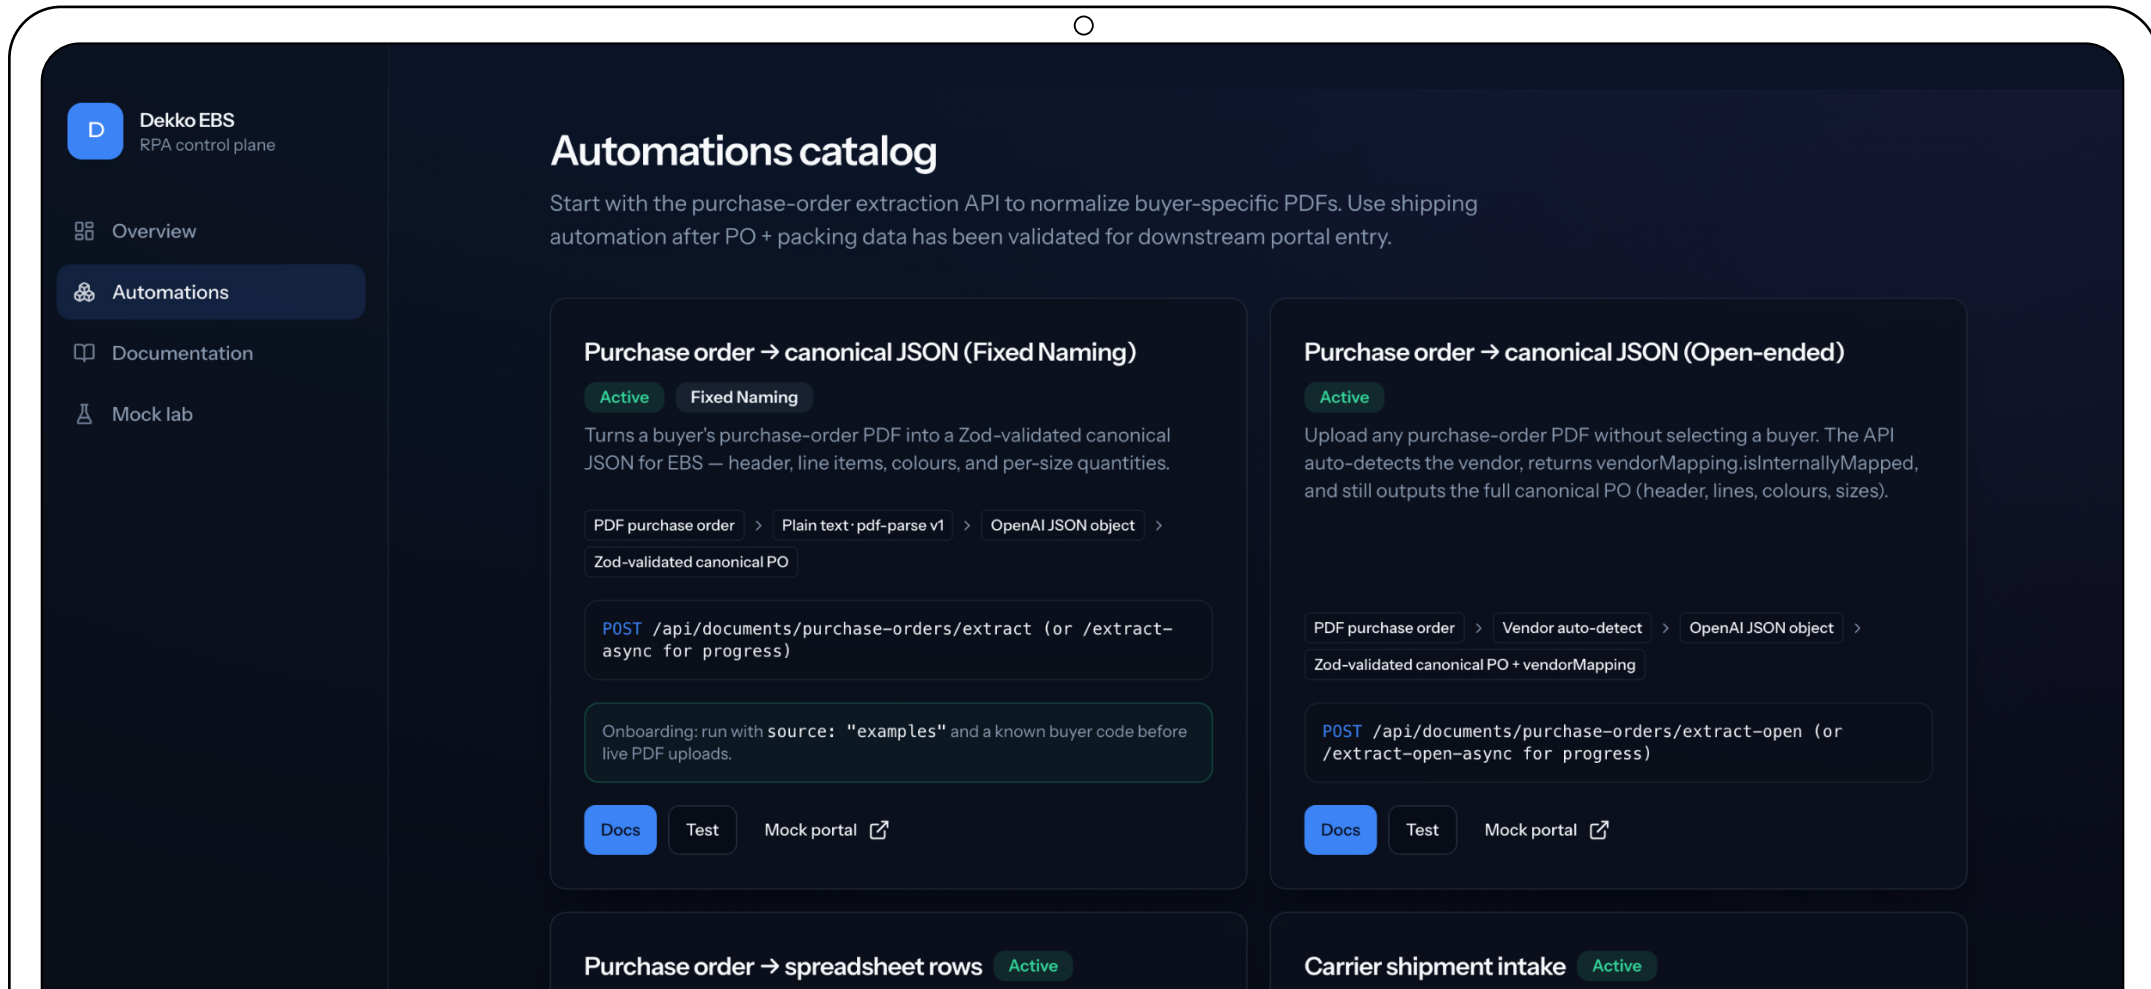

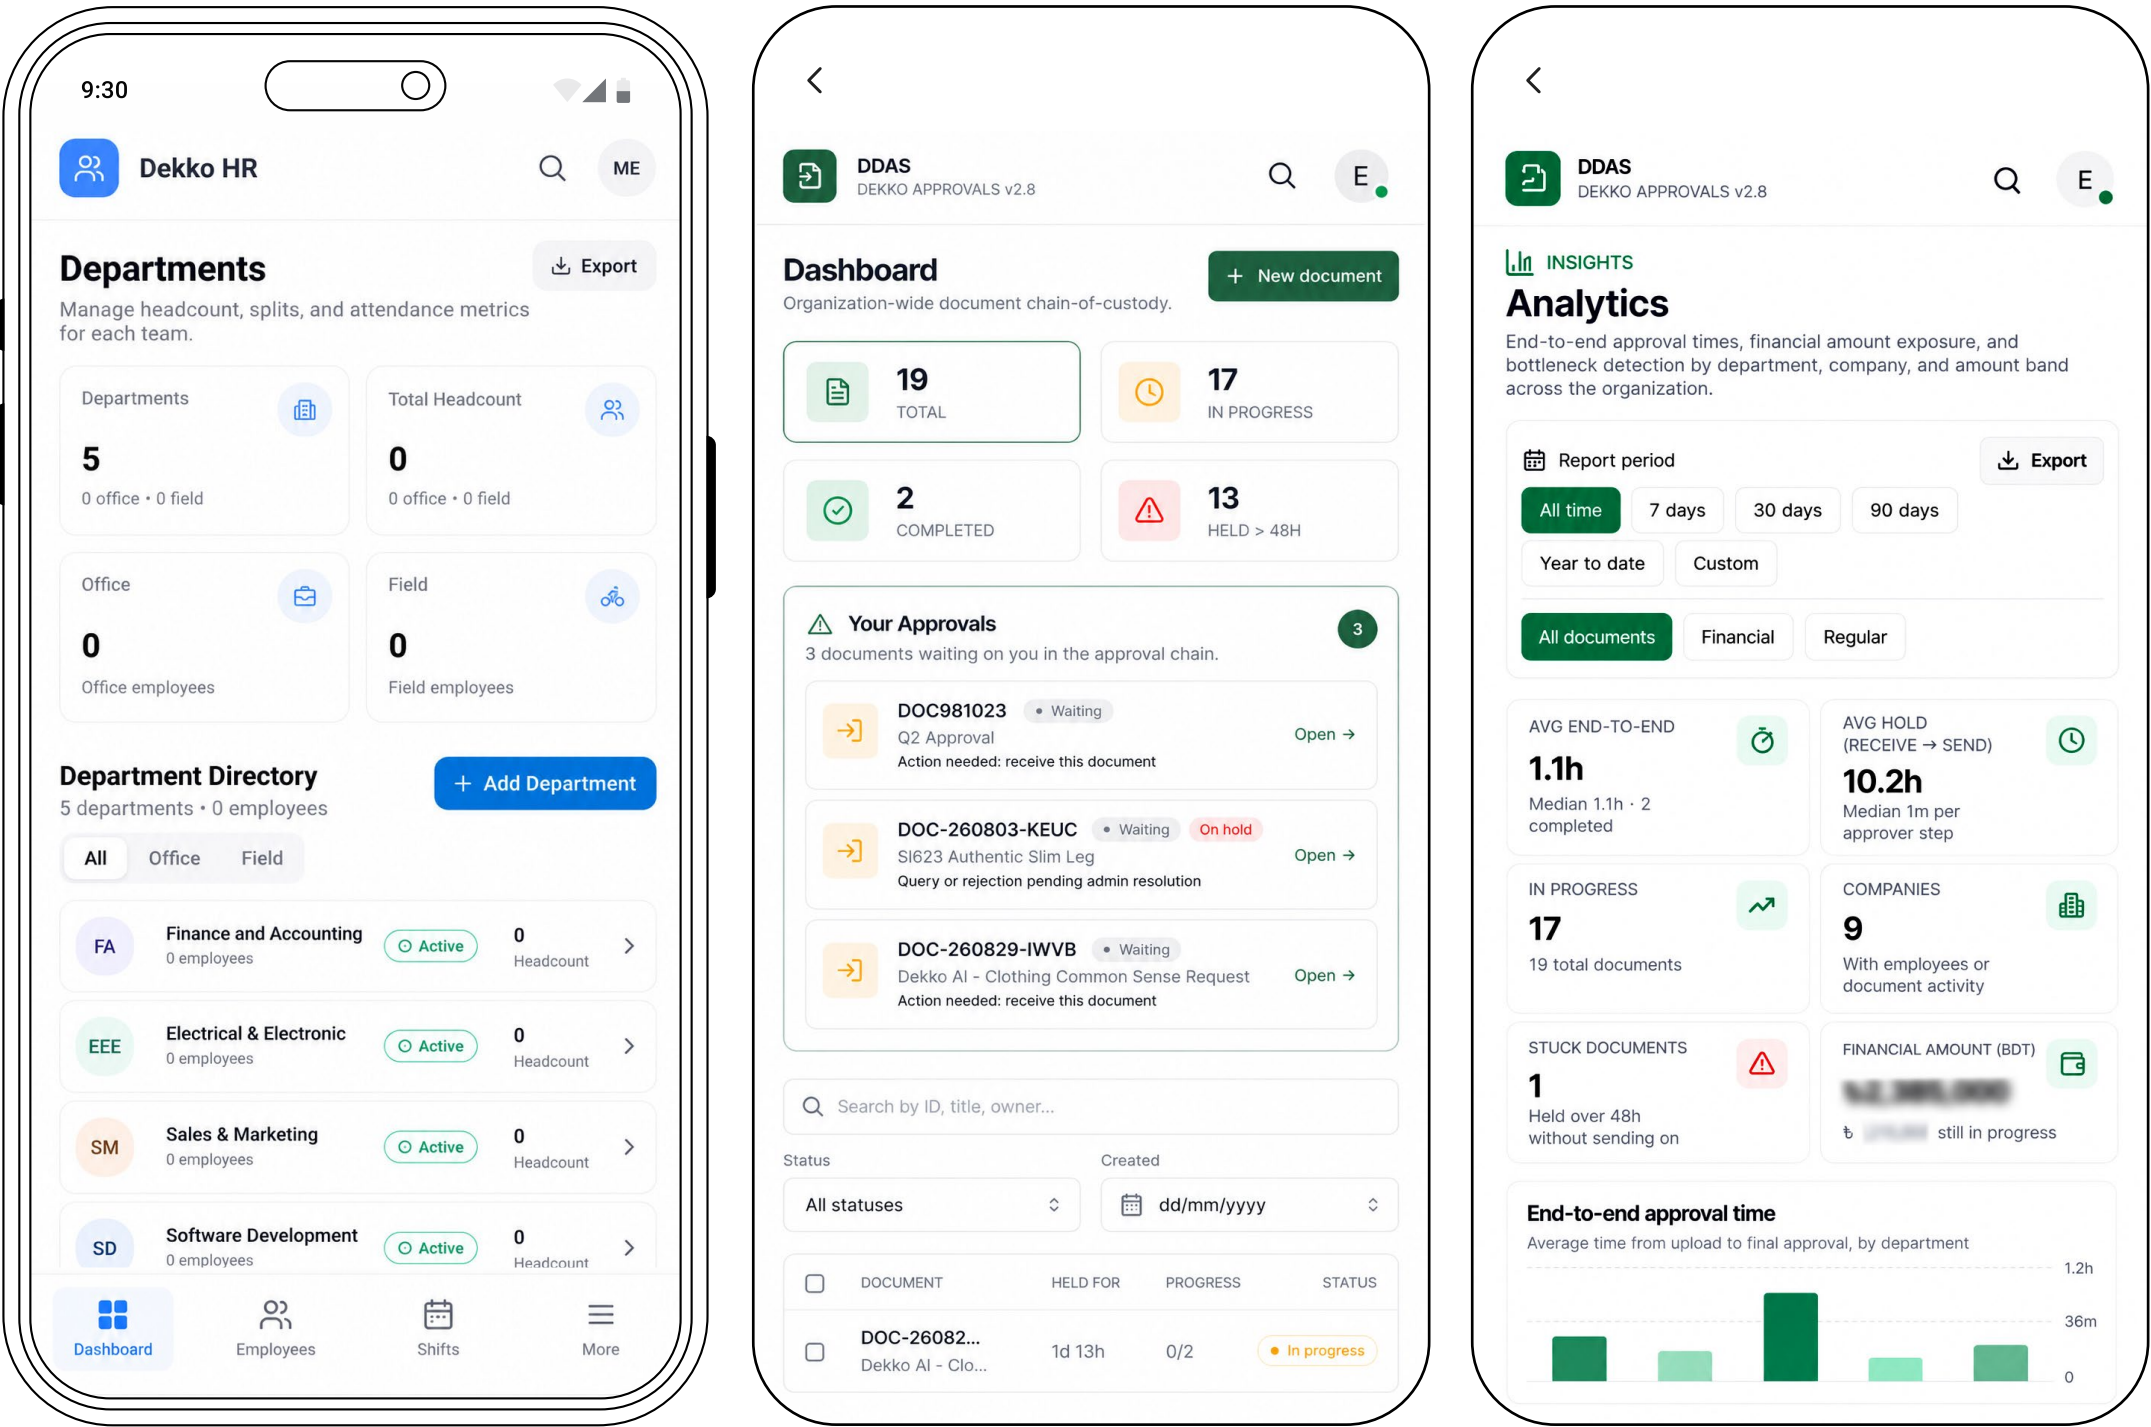

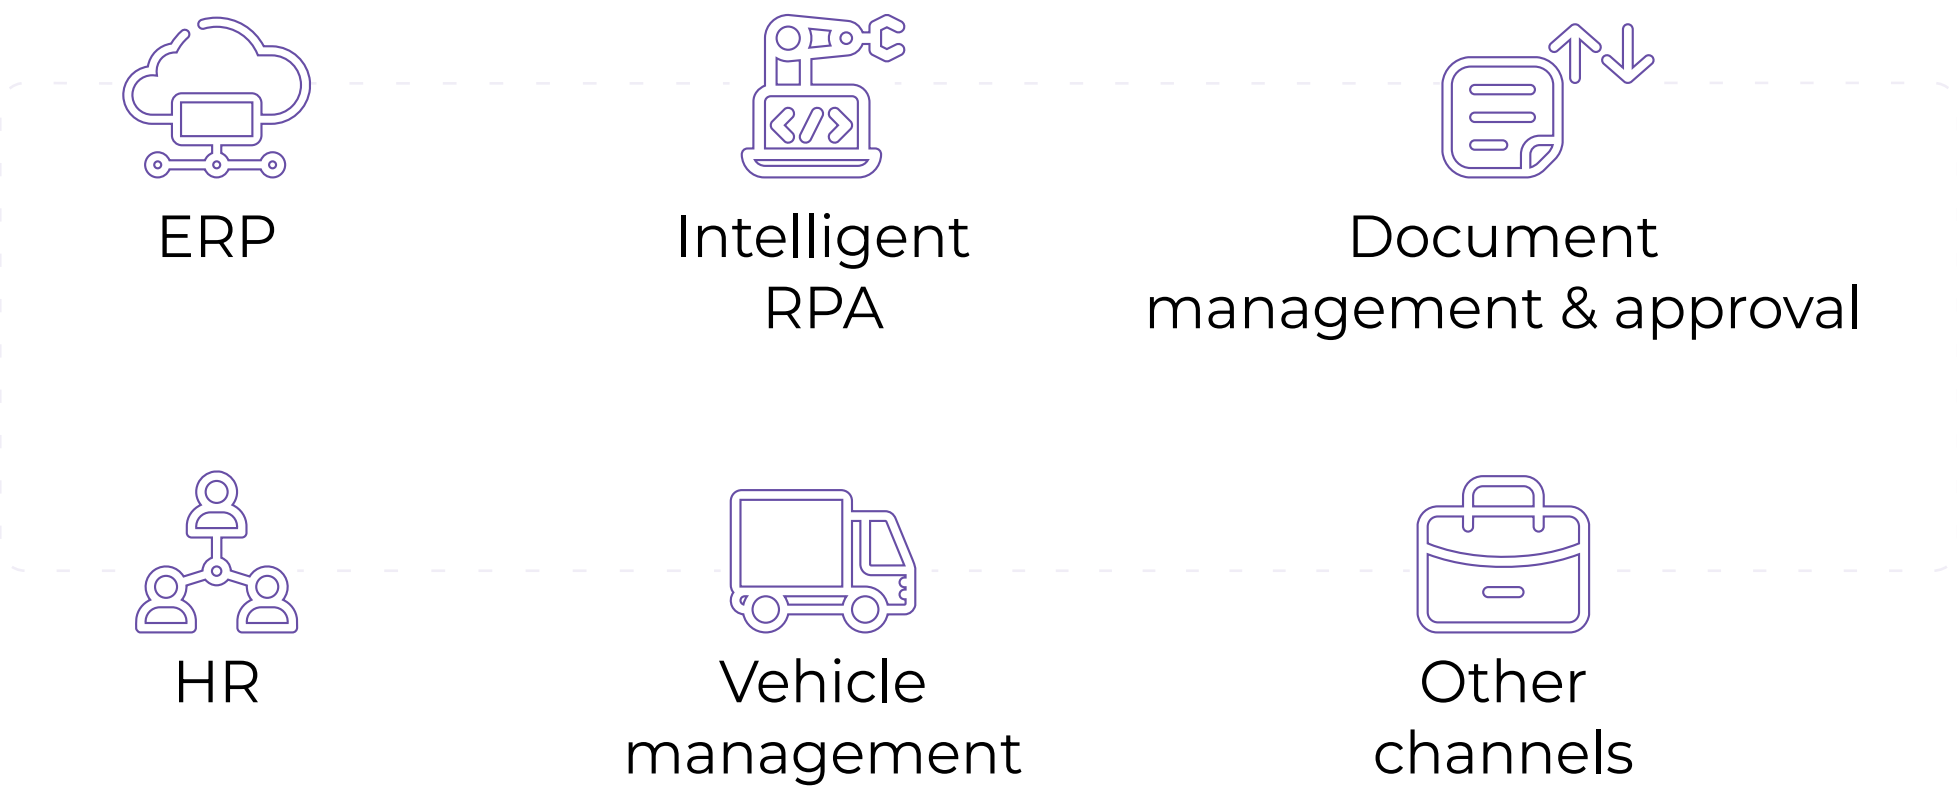

PROJECT 06

Dekko ISHO Group is a diversified Bangladeshi conglomerate with extensive RMG operations and businesses spanning multiple companies and functions.

Industry: RMG

We started with consulting and making **6 seperate modules** that cater to **different departments** within the organization.

PROJECT 06

Then Connected
The Modules
And Moved

APPROVED AI AGENTS AND BUSINESS TOOLS

PROJECT 07

POLYSIGNALS

Polysignals is a market intelligence and reputation platform that makes trading signals measurable, verifiable, and public.

Bonotech built the web and mobile experience connecting signal creation, on-chain verification, analyst reputation, rankings, and community interaction.

Industry: Trading Intelligence

Platform Surfaces We Built

Signal Infrastructure

Publish, timestamp and track market calls

On-Chain Verification

Immutable records for every signal

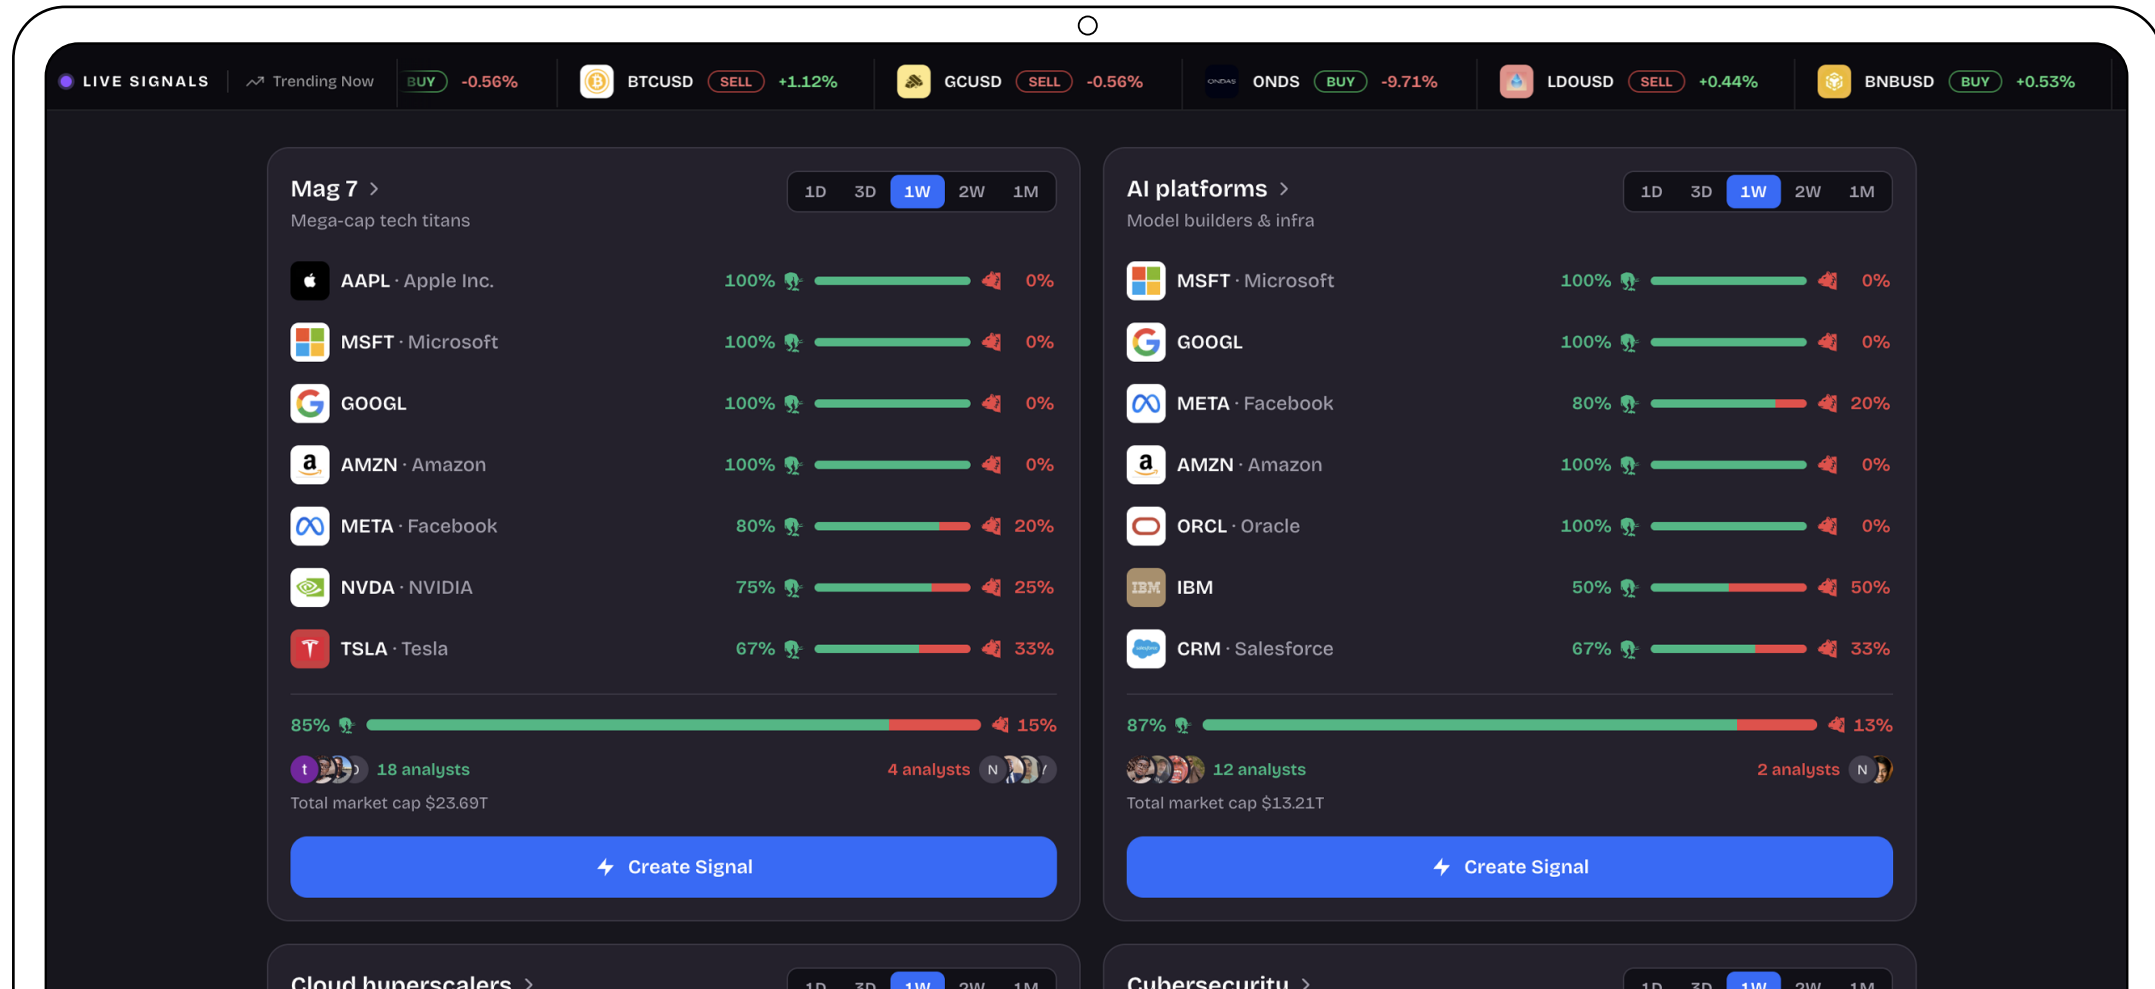

Reputation & Ranking

PolyRating, leaderboards and analyst performance

Community Intelligence

Discussion, discovery and market sentiment

Sprint Timeline: 23 Days

PROJECT 07

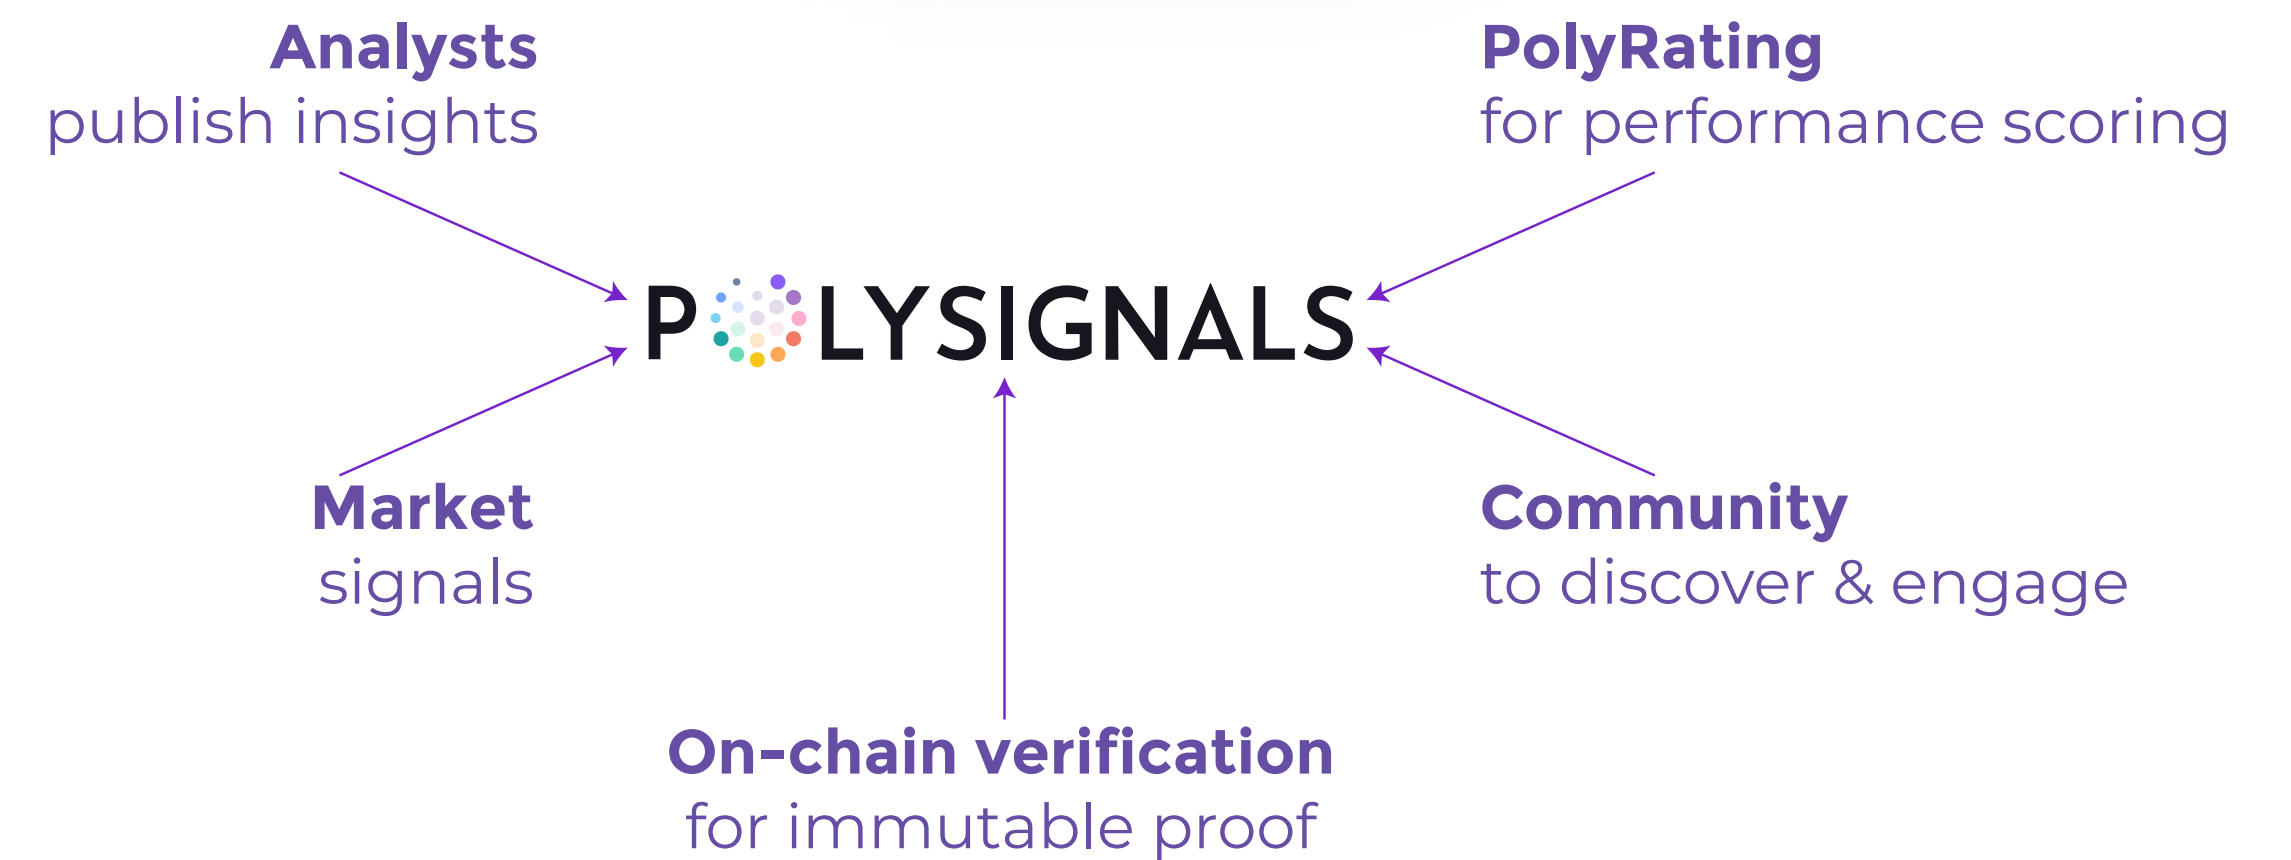

Sprint Breakdown

- Phase 1** Defining Signals & Reputation
Day 1-5
- Phase 2** Building Market & User Infrastructure
Day 5-12
- Phase 3** Creating On-Chain Verification
Day 12-16
- Phase 4** Building Ratings, Rankings & Community
Day 16-20
- Phase 5** Testing, Optimizing & Launching
Day 20-23

Timeline: 23 Days

How We Put Market Claims On

WHERE SPEED MEETS PRECISION

“ I couldn't believe my eyes when I first saw what the team had built out for me. Looks so good. There's massive companies in the space who still haven't been able to modernize a proper web-based application form, so excited to be the first one to launch a modern web-application for card prep & cleaning.

Evan Milho
CEO, EVO Grading

Super impressive team with a can-do attitude. No requests that I have made has ever been met with not possible or can't do. Pretty much they can build any and everything!

Dan Iqbal
CEO, Get My Grail

Polysignals is the highest quality app built in the shortest possible time that I have seen in quite some time. Speaking as someone who works with the highest level of engineers on a daily basis, bonotech is the real deal!

”

Nafis Abrar
ML Engineer at Meta Facebook
